

AKR1C2 Antibody
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP53284**Specification****AKR1C2 Antibody - Product Information**

Application	WB
Primary Accession	P52895
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Calculated MW	37 KDa
Antigen Region	21-70

AKR1C2 Antibody - Additional Information**Gene ID** 1646**Other Names**

Aldo-keto reductase family 1 member C2, 1.----, 3-alpha-HSD3, Chlordecone reductase homolog HAKRD, Dihydrodiol dehydrogenase 2, DD-2, DD2, Dihydrodiol dehydrogenase/bile acid-binding protein, DD/BABP, Trans-1, 2-dihydrobenzene-1, 2-diol dehydrogenase, 1.3.1.20, Type III 3-alpha-hydroxysteroid dehydrogenase, 1.1.1.357, AKR1C2, DDH2

Dilution

WB~~ 1:1000

Format

Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.09% (W/V) sodium azide and 50% glycerol

Storage

Store at -20 °C. Stable for 12 months from date of receipt

AKR1C2 Antibody - Protein Information**Name** AKR1C2**Synonyms** DDH2**Function**

Cytosolic aldo-keto reductase that catalyzes the NADH and NADPH-dependent reduction of ketosteroids to hydroxysteroids (PubMed:19218247). Most probably acts as a reductase *in vivo* since the oxidase activity measured *in vitro* is inhibited by physiological concentrations of NADPH (PubMed:14672942). Displays a broad positional specificity acting on positions 3, 17 and 20 of steroids and regulates the metabolism of hormones like estrogens and androgens (PubMed:14672943).

href="http://www.uniprot.org/citations/10998348" target="_blank">>10998348). Works in concert with the 5-alpha/5-beta-steroid reductases to convert steroid hormones into the 3-alpha/5-alpha and 3- alpha/5-beta-tetrahydrosteroids. Catalyzes the inactivation of the most potent androgen 5-alpha-dihydrotestosterone (5-alpha-DHT) to 5-alpha-androstan-3-alpha,17-beta-diol (3-alpha-diol) (PubMed:>15929998, PubMed:>17034817, PubMed:>17442338, PubMed:>8573067). Also specifically able to produce 17beta-hydroxy-5alpha-androstan-3-one/5alphaDHT (PubMed:>10998348). May also reduce conjugated steroids such as 5alpha- dihydrotestosterone sulfate (PubMed:>19218247). Displays affinity for bile acids (PubMed:>8486699).

Cellular Location

Cytoplasm, cytosol.

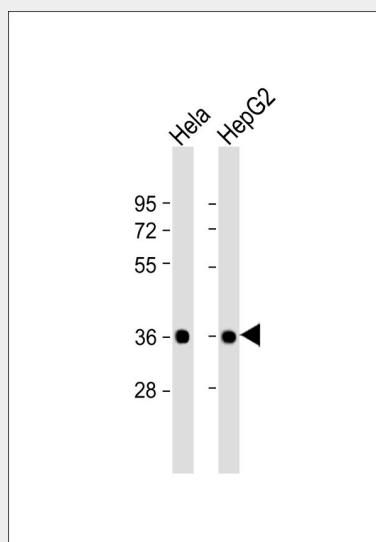

Tissue Location

Expressed in fetal testes. Expressed in fetal and adult adrenal glands.

AKR1C2 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

AKR1C2 Antibody - Images

All lanes : Anti-AKR1C2 Antibody at 1:1000 dilution Lane 1: Hela whole cell lysate Lane 2: HepG2 whole cell lysate Lysates/proteins at 20 µg per lane. Secondary Goat Anti-Rabbit IgG, (H+L), Peroxidase conjugated at 1/10000 dilution. Predicted band size : 37 kDa Blocking/Dilution buffer: 5% NFDM/TBST.

AKR1C2 Antibody - Background

Works in concert with the 5-alpha/5-beta-steroid reductases to convert steroid hormones into the 3-alpha/5-alpha and 3-alpha/5-beta-tetrahydrosteroids. Catalyzes the inactivation of the most potent androgen 5-alpha-dihydrotestosterone (5-alpha-DHT) to 5-alpha-androstan-3-alpha,17-beta-diol (3-alpha-diol). Has a high bile-binding ability.
