

TMEM111 Antibody (N-term)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP5782a**Specification**

TMEM111 Antibody (N-term) - Product Information

Application	WB, FC,E
Primary Accession	Q9P0I2
Other Accession	Q5U2V8 , Q99KI3 , Q7SXW4 , Q3ZCB8 , NP_060917.1
Reactivity	Human
Predicted	Bovine, Zebrafish, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Antigen Region	42-70

TMEM111 Antibody (N-term) - Additional Information**Gene ID** 55831**Other Names**

ER membrane protein complex subunit 3, Transmembrane protein 111, EMC3, TMEM111

Target/Specificity

This TM111 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 42-70 amino acids from the N-terminal region of human TM111.

DilutionWB~~1:1000
FC~~1:10~50**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

TMEM111 Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

TMEM111 Antibody (N-term) - Protein Information**Name** EMC3

Synonyms TMEM111

Function Part of the endoplasmic reticulum membrane protein complex (EMC) that enables the energy-independent insertion into endoplasmic reticulum membranes of newly synthesized membrane proteins (PubMed:[30415835](#), PubMed:[29809151](#), PubMed:[29242231](#), PubMed:[32459176](#), PubMed:[32439656](#)). Preferentially accommodates proteins with transmembrane domains that are weakly hydrophobic or contain destabilizing features such as charged and aromatic residues (PubMed:[30415835](#), PubMed:[29809151](#), PubMed:[29242231](#)). Involved in the cotranslational insertion of multi-pass membrane proteins in which stop-transfer membrane-anchor sequences become ER membrane spanning helices (PubMed:[30415835](#), PubMed:[29809151](#)). It is also required for the post-translational insertion of tail-anchored/TA proteins in endoplasmic reticulum membranes (PubMed:[29809151](#), PubMed:[29242231](#)). By mediating the proper cotranslational insertion of N-terminal transmembrane domains in an N-exo topology, with translocated N-terminus in the lumen of the ER, controls the topology of multi-pass membrane proteins like the G protein-coupled receptors (PubMed:[30415835](#)). By regulating the insertion of various proteins in membranes, it is indirectly involved in many cellular processes (Probable).

Cellular Location

Endoplasmic reticulum membrane; Multi-pass membrane protein

TMEM111 Antibody (N-term) - Protocols
