

NKRF Antibody (Center)

Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP6660c

Specification

NKRF Antibody (Center) - Product Information

Application WB, IHC-P,E **Primary Accession** 015226 Other Accession **08BY02** Reactivity Human Predicted Mouse Host **Rabbit** Clonality **Polyclonal** Isotype Rabbit IgG Calculated MW 77673 Antigen Region 205-233

NKRF Antibody (Center) - Additional Information

Gene ID 55922

Other Names

NF-kappa-B-repressing factor, NFkB-repressing factor, Protein ITBA4, Transcription factor NRF, NKRF, ITBA4, NRF

Target/Specificity

This NKRF antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 205-233 amino acids from the Central region of human NKRF.

Dilution

WB~~1:1000 IHC-P~~1:50~100

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

NKRF Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

NKRF Antibody (Center) - Protein Information

Name NKRF {ECO:0000303|PubMed:32179686, ECO:0000312|HGNC:HGNC:19374}

Function Enhances the ATPase activity of DHX15 by acting like a brace that tethers mobile sections of DHX15 together, stabilizing a functional conformation with high RNA affinity of DHX15 (PubMed:12381793). Involved in the constitutive silencing of the interferon beta promoter, independently of the virus-induced signals, and in the inhibition of the basal and cytokine-induced iNOS promoter activity (PubMed:12381793). Also involved in the regulation of IL-8 transcription (PubMed:12381793). May also act as a DNA-binding transcription regulator: interacts with a specific negative regulatory element (NRE) 5'-AATTCCTCTGA-3' to mediate transcriptional repression of certain NK-kappa-B responsive genes (PubMed:10562553).

Cellular Location Nucleus, nucleolus.

Tissue Location

Widely and constitutively expressed (PubMed:10562553). Expressed at lower level in colon, peripheral blood lymphocytes, lung and kidney (PubMed:10562553)

NKRF Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

NKRF Antibody (Center) - Images

Western blot analysis of NKRF antibody (Center) (Cat. #AP6660c) in Jurkat cell line lysates (35ug/lane). NKRF (arrow) was detected using the purified Pab.

Formalin-fixed and paraffin-embedded human brain reacted with NKRF Antibody (Center), which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.

NKRF Antibody (Center) - Background

NKRF is a transcription factor that interacts with specific negative regulatory elements (NREs) to mediate transcriptional repression of certain NK-kappa-B-responsive genes. The protein localizes predominantly to the nucleolus with a small fraction found in the nucleoplasm and cytoplasm.
