

### **VTN Antibody (C-term)**

Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP7462b

## **Specification**

## VTN Antibody (C-term) - Product Information

Application WB, IHC-P, FC,E

Primary Accession
Reactivity
Human
Host
Clonality
Polyclonal
Isotype
Rabbit IgG
Calculated MW
Antigen Region
Section P04004
Human
Rabbit
Rabbit
Polyclonal
Rabbit IgG
S4306
Antigen Region

## VTN Antibody (C-term) - Additional Information

### **Gene ID 7448**

### **Other Names**

Vitronectin, VN, S-protein, Serum-spreading factor, V75, Vitronectin V65 subunit, Vitronectin V10 subunit, Somatomedin-B, VTN

### Target/Specificity

This VTN antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 352-379 amino acids from the C-terminal region of human VTN.

### **Dilution**

WB~~1:1000 IHC-P~~1:10~50 FC~~1:10~50

#### **Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

#### Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

#### **Precautions**

VTN Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

# VTN Antibody (C-term) - Protein Information

#### Name VTN

Tel: 858.875.1900 Fax: 858.875.1999

Function Vitronectin is a cell adhesion and spreading factor found in serum and tissues. Vitronectin interact with glycosaminoglycans and proteoglycans. Is recognized by certain members of the integrin family and serves as a cell-to-substrate adhesion molecule. Inhibitor of the membrane-damaging effect of the terminal cytolytic complement pathway.

### **Cellular Location**

Secreted, extracellular space

### **Tissue Location**

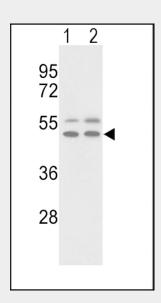

Expressed in the retina pigment epithelium (at protein level) (PubMed:25136834). Expressed in plasma (at protein level) (PubMed:2448300). Expressed in serum (at protein level) (PubMed:29567995).

## VTN Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

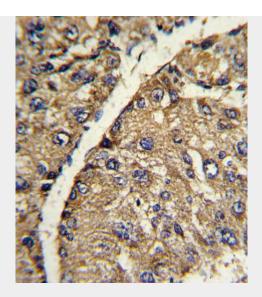

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

## VTN Antibody (C-term) - Images

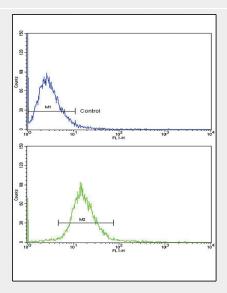

Western blot analysis of VTN Antibody (C-term) (Cat.#AP7462b) in NCI-H460(lane 1), HepG2(lane 2) cell line lysates (35ug/lane). VTN (arrow) was detected using the purified Pab.

Formalin-fixed and paraffin-embedded human hepatocarcinoma with VTN Antibody (C-term), which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.

Flow cytometric analysis of NCI-H292 cells using VTN Antibody (C-term)(bottom histogram) compared to a negative control cell (top histogram). FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.

# VTN Antibody (C-term) - Background

VTN is a member of the pexin family. This protein is found in serum and tissues and promotes cell adhesion and spreading, inhibits the membrane-damaging effect of the terminal cytolytic complement pathway, and binds to several serpin serine protease inhibitors. The protein is a secreted protein and exists in either a single chain form or a clipped, two chain form held together by a disulfide bond.
