

### NIK Antibody (C-term)

Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP8004a

### **Specification**

## NIK Antibody (C-term) - Product Information

Application WB,E
Primary Accession O95819
Reactivity Human
Host Rabbit
Clonality Polyclonal
Isotype Rabbit IgG
Antigen Region 618-649

# NIK Antibody (C-term) - Additional Information

#### **Gene ID 9448**

#### **Other Names**

Mitogen-activated protein kinase kinase kinase kinase 4, HPK/GCK-like kinase HGK, MAPK/ERK kinase kinase 4, MEK kinase kinase 4, MEKKK 4, Nck-interacting kinase, MAP4K4, HGK, KIAA0687, NIK

#### Target/Specificity

This NIK antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 618-649 amino acids from the C-terminal region of human NIK.

# **Dilution**

WB~~1:1000

### **Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

#### Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

# **Precautions**

NIK Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

# NIK Antibody (C-term) - Protein Information

### Name MAP4K4

Synonyms HGK, KIAA0687, NIK

Function Serine/threonine kinase that may play a role in the response to environmental stress and cytokines such as TNF-alpha. Appears to act upstream of the JUN N-terminal pathway. Phosphorylates SMAD1 on Thr- 322.

**Cellular Location** Cytoplasm.

### **Tissue Location**

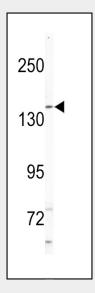

Widely expressed. Isoform 5 is abundant in the brain. Isoform 4 is predominant in the liver, skeletal muscle and placenta.

# NIK Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

# NIK Antibody (C-term) - Images

Western blot analysis of anti-HGK Antibody (C-term)(Cat.#AP8004a) in jurkat cell line lysates (35ug/lane). HGK(arrow) was detected using the purified Pab.

### NIK Antibody (C-term) - Background

HGK, a member of the STE20 subfamily of Ser/Thr protein kinases, may play a role in the response to environmental stress and cytokines such as TNF-alpha. It appears to act upstream of the JUN N-terminal pathway. This protein is thought to interact with the SH3 domain of the adapter proteins Nck. HGK binds, via its CNH regulatory domain, to the N-terminal region of SPG3A. Expression appears to be ubiquitous, expressed in all tissue types examined. Isoform 5 appears to be more abundant in the brain, and isoform 4 is predominant in the liver, skeletal muscle and placenta.
