**Target/Specificity**

This AK3 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 23-53 amino acids from the N-terminal region of human AK3.

**Dilution**

WB~~1:1000

**Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

AK3 Antibody (N-term F210) is for research use only and not for use in diagnostic or therapeutic procedures.

**AK3 Antibody (N-term F210) - Protein Information****Name** AK4 {ECO:0000255|HAMAP-Rule:MF\_03170}

**Function** Involved in maintaining the homeostasis of cellular nucleotides by catalyzing the interconversion of nucleoside phosphates (PubMed:[19073142](#), PubMed:[19766732](#), PubMed:[23416111](#), PubMed:[24767988](#)). Efficiently phosphorylates AMP and dAMP using ATP as phosphate donor, but phosphorylates only AMP when using GTP as phosphate donor (PubMed:[19073142](#), PubMed:[19766732](#), PubMed:[23416111](#)). Also displays broad nucleoside diphosphate kinase activity (PubMed:[19073142](#), PubMed:[19766732](#), PubMed:[23416111](#)). Plays a role in controlling cellular ATP levels by regulating phosphorylation and activation of the energy sensor protein kinase AMPK (PubMed:[24767988](#), PubMed:[26980435](#)). Plays a protective role in the cellular response to oxidative stress (PubMed:[19130895](#), PubMed:[23474458](#), PubMed:[26980435](#)).

### AK3 Antibody (N-term F210) - Background

AK3 is a member of the adenylate kinase family of enzymes. This protein is localized to the

mitochondrial matrix. Adenylate kinases regulate the adenine and guanine nucleotide compositions within a cell by catalyzing the reversible transfer of phosphate group among these nucleotides. Five isozymes of adenylate kinase have been identified in vertebrates. Expression of these isozymes is tissue-specific and developmentally regulated.
