

PISD Antibody (Center)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP8829c**Specification**

PISD Antibody (Center) - Product Information

Application	WB, IHC-P, FC,E
Primary Accession	O9UG56
Other Accession	NP_055153
Reactivity	Human, Mouse
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	46672
Antigen Region	223-250

PISD Antibody (Center) - Additional Information**Gene ID** 23761**Other Names**

Phosphatidylserine decarboxylase proenzyme, Phosphatidylserine decarboxylase alpha chain, Phosphatidylserine decarboxylase beta chain, PISD

Target/Specificity

This PISD antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 223-250 amino acids from the Central region of human PISD.

Dilution

WB~~1:1000
IHC-P~~1:50~100
FC~~1:10~50

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

PISD Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

PISD Antibody (Center) - Protein Information**Name** PISD {ECO:0000255|HAMAP-Rule:MF_03208}

Function Catalyzes the formation of phosphatidylethanolamine (PtdEtn) from phosphatidylserine (PtdSer) (PubMed:[30488656](#), PubMed:[30858161](#)). Plays a central role in phospholipid metabolism and in the interorganelle trafficking of phosphatidylserine. May be involved in lipid droplet biogenesis at the endoplasmic reticulum membrane (By similarity).

Cellular Location

[Phosphatidylserine decarboxylase beta chain]: Mitochondrion inner membrane {ECO:0000255|HAMAP-Rule:MF_03208, ECO:0000305|PubMed:30858161, ECO:0000305|PubMed:33718843}; Single-pass membrane protein {ECO:0000255|HAMAP-Rule:MF_03208}; Intermembrane side {ECO:0000255|HAMAP-Rule:MF_03208} [Isoform 1]: Mitochondrion inner membrane

PISD Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

PISD Antibody (Center) - Images

Western blot analysis of PISD Antibody (Center) (Cat. #AP8829c) in mouse cerebellum tissue and mouse NIH-3T3 cell line lysates (35ug/lane). PISD (arrow) was detected using the purified Pab.

Formalin-fixed and paraffin-embedded human brain reacted with PSD Antibody (Center), which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.

PSD Antibody (Center) (Cat. #AP8829c) flow cytometric analysis of NCI-H460 cells (right histogram) compared to a negative control cell (left histogram). FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.

PSD Antibody (Center) - Background

Phosphatidylserine decarboxylases catalyze the formation of phosphatidylethanolamine (PE) by decarboxylation of phosphatidylserine (PS). Type I PSDs, such as PSD, are targeted to the inner mitochondrial membrane by an N-terminal targeting sequence. PSD also contains a conserved LGST motif that functions as an autocatalytic cleavage site where the proenzyme is split into mature alpha and beta subunits
