

SELT Antibody (N-term)

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP9306a

Specification

SELT Antibody (N-term) - Product Information

Application Primary Accession Other Accession Reactivity Predicted Host Clonality Isotype Antigen Region

WB, FC,E <u>P62341</u> <u>O1H5H1, P62342, O5ZJN8, A6OP01</u> Human Bovine, Chicken, Mouse, Rat Rabbit Polyclonal Rabbit IgG 48-75

SELT Antibody (N-term) - Additional Information

Gene ID 51714

Other Names Selenoprotein T, SelT, SELT

Target/Specificity

This SELT antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 48-75 amino acids from the N-terminal region of human SELT.

Dilution WB~~1:1000 FC~~1:10~50

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions SELT Antibody (N-term) is for research use only and not for use in diagnostic or therapeutic procedures.

SELT Antibody (N-term) - Protein Information

Name SELENOT {ECO:0000303|PubMed:27645994, ECO:0000312|HGNC:HGNC:18136}

Function Selenoprotein with thioredoxin reductase-like oxidoreductase activity (By similarity).

Protects dopaminergic neurons against oxidative stress and cell death (PubMed:<u>26866473</u>). Involved in ADCYAP1/PACAP-induced calcium mobilization and neuroendocrine secretion (By similarity). Plays a role in fibroblast anchorage and redox regulation (By similarity). In gastric smooth muscle, modulates the contraction processes through the regulation of calcium release and MYLK activation (By similarity). In pancreatic islets, involved in the control of glucose homeostasis, contributes to prolonged ADCYAP1/PACAP- induced insulin secretion (By similarity).

Cellular Location

Endoplasmic reticulum membrane {ECO:0000250|UniProtKB:Q1H5H1}; Single-pass membrane protein

Tissue Location

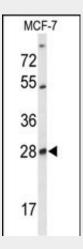

Ubiquitous. Highly expressed in the endocrine pancreas.

SELT Antibody (N-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

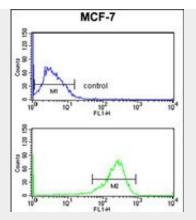

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

SELT Antibody (N-term) - Images

Western blot analysis of SELT Antibody (N-term) (Cat. #AP9306a) in MCF-7 cell line lysates (35ug/lane). SELT (arrow) was detected using the purified Pab.

SELT Antibody (N-term) (Cat. #AP9306a) flow cytometry analysis of MCF-7 cells (bottom histogram) compared to a negative control cell (top histogram).FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.

SELT Antibody (N-term) - Background

SELT encodes a selenoprotein, which contains a selenocysteine (Sec) residue at its active site. The selenocysteine is encoded by the UGA codon that normally signals translation termination. The 3' UTR of selenoprotein genes have a common stem-loop structure, the sec insertion sequence (SECIS), that is necessary for the recognition of UGA as a Sec codon rather than as a stop signal.
