Bub3 Antibody
Catalog # ASC10541

Specification

Bub3 Antibody - Product Information

Application	**WB, ICC, IF**
Primary Accession	O43684
Other Accession	O43684, 7387554
Reactivity	**Human, Mouse**
Host	**Rabbit**
Clonality	**Polyclonal**
Isotype	**IgG**
Application Notes	**Bub3 antibody can be used for detection of bub3 by Western blot at 0.5 - 1 µg/mL. Antibody can also be used for immunocytochemistry starting at 10 µg/mL. For immunofluorescence start at 20 µg/mL.**

Bub3 Antibody - Additional Information

Gene ID **9184**

Target/Specificity
BUB3;

Reconstitution & Storage
Bub3 antibody can be stored at 4℃ for three months and -20℃, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Precautions
Bub3 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Bub3 Antibody - Protein Information

Name BUB3

Function
Has a dual function in spindle-assembly checkpoint signaling and in promoting the establishment of correct kinetochore-microtubule (K-MT) attachments. Promotes the formation of stable end-on bipolar attachments. Necessary for kinetochore localization of BUB1. Regulates chromosome segregation during oocyte meiosis. The BUB1/BUB3 complex plays a role in the inhibition of anaphase-promoting complex or cyclosome (APC/C) when spindle-assembly checkpoint is activated and inhibits the ubiquitin ligase activity of APC/C by phosphorylating its activator CDC20. This complex can also phosphorylate MAD1L1.

Cellular Location
Nucleus. Chromosome, centromere, kinetochore. Note=Starts to localize at kinetochores in

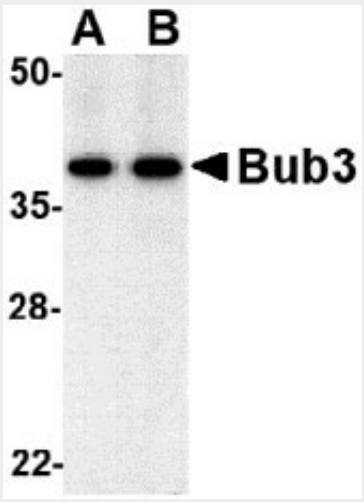
prometaphase I (Pro-MI) stage and maintains the localization until the metaphase I- anaphase I (MI-AI) transition.

Bub3 Antibody - Protocols

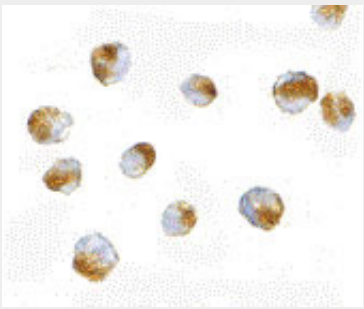
Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

Bub3 Antibody - Images



Western blot analysis of bub3 in Jurkat cell lysate with bub3 antibody at (A) 0.5 and (B) 1 µg/mL.



Immunocytochemistry of Bub3 in Jurkat cells with Bub3 antibody at 10 µg/mL.

Immunofluorescence of bub3 in Jurkat cells with bub3 antibody at 20 µg/mL.

Bub3 Antibody - Background

Bub3 Antibody: The mitotic checkpoint protein Bub3 is involved with the essential spindle checkpoint pathway which operates during early embryogenesis. Bub3 is important during G2 and early mitosis stages, permitting entry into mitosis depending upon the assembly state of microtubules, thus preventing premature sister chromatid separation, mis-segregation and aneuploidy. Bub3 contains four WD repeat domains and is required for the kinetochore localization of Bub1, a related kinase that is necessary for spindle assembly checkpoint function. Bub1 is able to autophosphorylate and can catalyze the phosphorylation of Bub3. Both Bub1 and Bub3 are mutually dependent for function. Altered Bub expression levels may significantly impair mitotic checkpoint function and is associated with tumor cell proliferation.
