

**STEAP3 Antibody**  
Catalog # ASC10574**Specification****STEAP3 Antibody - Product Information**

|                   |   |
|-------------------|---|
| Application       | WB, IHC, IF   |
| Primary Accession | <a href="#">Q658P3</a>  |
| Other Accession   | <a href="#">AAH95421</a> , <a href="#">127801437</a>  |
| Reactivity        | Human, Mouse, Rat   |
| Host              | Rabbit  |
| Clonality         | Polyclonal  |
| Isotype           | IgG   |
| Calculated MW     | Predicted: 55 kDa   |
| Application Notes | Observed: 51 kDa KDa<br>STEAP3 antibody can be used for detection of STEAP3 by Western blot at 1 - 2 µg/mL. Antibody can also be used for immunohistochemistry starting at 2.5 µg/mL. For immunofluorescence start at 20 µg/mL. |

**STEAP3 Antibody - Additional Information**

Gene ID 55240

**Target/Specificity**

STEAP3; This STEAP3 antibody does not cross-react with other STEAP proteins.

**Reconstitution & Storage**

STEAP3 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

**Precautions**

STEAP3 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**STEAP3 Antibody - Protein Information**

Name STEAP3

Synonyms TSAP6

**Function**Integral membrane protein that functions as a NADPH-dependent ferric-chelate reductase, using NADPH from one side of the membrane to reduce a Fe(3+) chelate that is bound on the other side of the membrane (PubMed: <http://www.uniprot.org/citations/26205815> target="\_blank">26205815</a>). Mediates sequential transmembrane electron transfer from NADPH to FAD and onto heme, and finally to the Fe(3+) chelate (By similarity). Can also reduce

Cu(2+) to Cu(1+) (By similarity). Mediates efficient transferrin-dependent iron uptake in erythroid cells (By similarity). May play a role downstream of p53/TP53 to interface apoptosis and cell cycle progression (By similarity). Indirectly involved in exosome secretion by facilitating the secretion of proteins such as TCTP (PubMed:<a href="http://www.uniprot.org/citations/15319436" target="\_blank">15319436</a>, PubMed:<a href="http://www.uniprot.org/citations/16651434" target="\_blank">16651434</a>).

#### Cellular Location

Endosome membrane {ECO:0000250|UniProtKB:Q8CI59}; Multi-pass membrane protein.  
Note=Localizes to vesicular- like structures at the plasma membrane and around the nucleus

#### Tissue Location

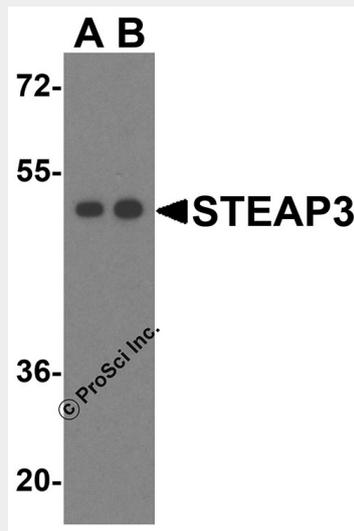

Expressed in adult bone marrow, placenta, liver, skeletal muscle and pancreas. Down-regulated in hepatocellular carcinoma.

### STEAP3 Antibody - Protocols

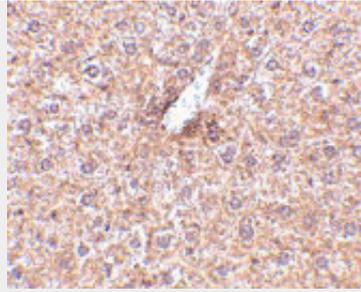

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

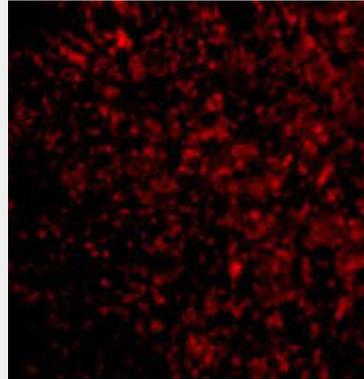

### STEAP3 Antibody - Images

Western blot analysis of STEAP3 in HeLa cell lysate with STEAP3 antibody at (A) 1 and (B) 2 µg/mL.

Immunohistochemistry of STEAP3 in mouse liver tissue with STEAP3 antibody at 2.5 µg/mL.

Immunofluorescence of STEAP3 in Mouse Liver cells with STEAP3 antibody at 20 µg/mL.

### **STEAP3 Antibody - Background**

**STEAP3 Antibody:** The six-transmembrane epithelial antigen of prostate 3 (STEAP3) is a member of a family of metalloreductases identified as cell-surface antigens in prostate tissue. Similar to two other members of the STEAP family (STEAP 2 and STEAP4), STEAP3 promotes both iron and copper reduction. STEAP3 is highly expressed in hematopoietic tissues and colocalizes with the transferrin endosome. Overexpression of STEAP3 stimulates iron reduction; mice lacking STEAP3 are deficient in erythroid ferrireductase activity, suggesting that STEAP3 is an endosomal ferrireductase required for transferrin-dependent iron uptake in erythroid cells.
