

GRTP1 Antibody
Catalog # ASC10686**Specification**

GRTP1 Antibody - Product Information

Application	WB
Primary Accession	Q5TC63
Other Accession	EAX09206 , 119629611
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Application Notes	GRTP1 antibody can be used for detection of GRTP1 by Western blot at 1 µg/mL.

GRTP1 Antibody - Additional InformationGene ID **79774****Target/Specificity**

GRTP1; At least three isoforms of GRTP1 are known to exist; this antibody should recognize all isoforms.

Reconstitution & Storage

GRTP1 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Precautions

GRTP1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

GRTP1 Antibody - Protein Information**Name** GRTP1**Synonyms** TBC1D6**Function**

May act as a GTPase-activating protein for Rab family protein(s).

GRTP1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)

- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

GRTP1 Antibody - Images

Western blot analysis of GRTP1 in SK-N-SH cell lysate with GRTP1 antibody at 1 μ g/mL in the (A) absence and (B) presence of blocking peptide.

GRTP1 Antibody - Background

GRTP1 Antibody: Growth hormone regulated TBC protein 1 (GRTP1) was identified through microarray analysis as a gene whose expression is regulated by growth hormone (GH). It contains the TBC signature motif of GTPase activator proteins of Rab-like small GTPases. GRTP1 mRNA is expressed at highest levels in testes, and is also present in kidney, lung, liver, and intestine. Administration of GH to mice resulted in an increase in GRTP1 mRNA in testes, but a decrease of GRTP1 mRNA in kidney and liver. GRTP1 was identified as an HIV dependency factor (HDF), suggesting that GRTP1 may be an important drug target in HIV treatment.
