

## **GPAT1** Antibody

Catalog # ASC10696

## **Specification**

# **GPAT1** Antibody - Product Information

Application WB
Primary Accession O9HCL2
Other Accession NP 0659

Other Accession
Reactivity
Host
NP\_065969, 57678
Human, Mouse, Rat
Rabbit

Clonality Polyclonal Isotype IgG

Calculated MW Predicted: 87, 91 kDa

Observed: 92 kDa KDa

Application Notes

GPAT1 antibody can be used for detection of GPAT1 by Western blot at 1 - 2 µg/mL.

Antibody can also be used for

immunohistochemistry starting at 2.5 µg/mL. For immunofluorescence start at 20

μg/mL.

## **GPAT1** Antibody - Additional Information

Gene ID **57678** 

### Target/Specificity

GPAT1 antibody was raised against a 15 amino acid synthetic peptide near the carboxy terminus of the human GPAT1.<br/>
- The immunogen is located within amino acids 730 - 780 of GPAT1.

### **Reconstitution & Storage**

GPAT1 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

#### **Precautions**

GPAT1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

### **GPAT1** Antibody - Protein Information

Name GPAM (HGNC:24865)

Synonyms GPAT1, KIAA1560

#### **Function**

Esterifies acyl-group from acyl-ACP to the sn-1 position of glycerol-3-phosphate, an essential step in glycerolipids biosynthesis such as triglycerides, phosphatidic acids and lysophosphatidic acids.

### **Cellular Location**

Tel: 858.875.1900 Fax: 858.875.1999

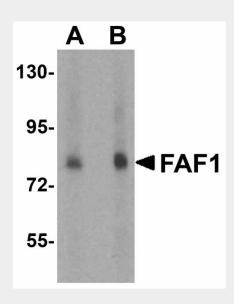

Mitochondrion outer membrane {ECO:0000250|UniProtKB:P97564}; Multi-pass membrane protein {ECO:0000250|UniProtKB:P97564}

# **GPAT1 Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

# **GPAT1 Antibody - Images**

Western blot analysis of FAF1 in THP-1 cell lysate with FAF1 antibody at (A) 1 and (B) 2 µg/mL.

### **GPAT1** Antibody - Background

GPAT1 Antibody: Glycerol-3-phosphate acyltransferase 1 (GPAT1), one of four known GPAT isoforms, is located on the mitochondrial outer membrane, allowing reciprocal regulation with carnitine palmitoyltransferase-1. It is thought to be critical for the development of hepatic steatosis; steatosis triggered by GPAT1 overexpression leads to hepatic and possibly peripheral insulin resistance. GPAT1 is transcriptionally upregulated by insulin and sterol regulatory element binding protein (SREBP-1) and downregulated by AMP-activated protein kinase. Mice deficient in GPAT1 exhibit decreased triacylglycerol (TAG) in cardiomyocytes even in high-fat diets, suggesting that GPAT1 contributes significantly to TAG accumulation in heart tissue during lipogenic or high fat diets.
