

CDIP Antibody
Catalog # ASC10859**Specification**

CDIP Antibody - Product Information

Application	WB, IHC, IF
Primary Accession	Q9H305
Other Accession	NP_037531 , 118344450
Reactivity	Human, Mouse
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Application Notes	CDIP antibody can be used for detection of CDIP by Western blot at 0.25 - 0.5 µg/mL. Antibody can also be used for immunohistochemistry starting at 2.5 µg/mL. For immunofluorescence start at 20 µg/mL.

CDIP Antibody - Additional Information

Gene ID	29965
Target/Specificity	
C16orf5;	

Reconstitution & Storage

CDIP antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Precautions

CDIP Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

CDIP Antibody - Protein Information

Name CDIP1

Synonyms C16orf5, CDIP, LITAF1

Function

Acts as an important p53/TP53-apoptotic effector. Regulates TNF-alpha-mediated apoptosis in a p53/TP53-dependent manner.

Cellular Location

Late endosome membrane; Peripheral membrane protein; Cytoplasmic side. Lysosome membrane; Peripheral membrane protein; Cytoplasmic side

Tissue Location

Highly expressed in brain. Expressed at lower level in heart, skeletal muscle, kidney, pancreas and liver. Weakly or not expressed in placenta and lung.

CDIP Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

CDIP Antibody - Images

Western blot analysis of CDIP in human brain lysate with CDIP antibody at (A) 0.25 and (B) 0.5 $\mu\text{g/mL}$.

Immunohistochemistry of CDIP in mouse brain tissue with CDIP antibody at 2.5 $\mu\text{g/mL}$.

Immunofluorescence of CDIP1 in mouse brain tissue with CDIP1 antibody at 20 µg/mL.

CDIP Antibody - Background

CDIP Antibody: The p53 tumor-suppressor gene integrates numerous signals that control cell life and death; loss of its functions contributes to the development of most cancers. CDIP is a novel pro-apoptotic target gene whose inhibition abrogates p53-mediated apoptotic responses. Overexpression of CDIP induced apoptosis in transfected cells while siRNA suppression of caspase-8 mRNA blocked this CDIP-induced apoptosis, indicating that the CDIP-dependent apoptosis pathway proceeds through extrinsic cell death pathway. CDIP may thus represent a novel target for drug design to maximize p53 response and sensitize tumor cells to cancer therapy. Multiple isoforms of CDIP are known to exist.
