ENC-2 Antibody
Catalog # ASC11108

Specification

ENC-2 Antibody - Product Information

Application	**WB, ICC, IF**
Primary Accession	Q9H0H3
Other Accession	AAV51405, 55418570
Reactivity	**Human**
Host	**Chicken**
Clonality	**Polyclonal**
Isotype	**IgY**
Application Notes	**ENC-2 antibody can be used for detection of ENC-2 by Western blot at 1 µg/mL. Antibody can also be used for immunocytochemistry starting at 5 µg/mL. For immunofluorescence start at 20 µg/mL.**

ENC-2 Antibody - Additional Information

Gene ID **64410**

Target/Specificity
KLHL25;

Reconstitution & Storage
ENC-2 antibody can be stored at 4℃ for three months and -20℃, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Precautions
ENC-2 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

ENC-2 Antibody - Protein Information

Name KLHL25 {ECO:0000303|PubMed:22578813, ECO:0000312|HGNC:HGNC:25732}

Function
Substrate-specific adapter of a BCR (BTB-CUL3-RBX1) E3 ubiquitin ligase complex involved in various processes, such as translation homeostasis and lipid synthesis (PubMed:22578813, PubMed:27664236, PubMed:34491895). The BCR(KLHL25) ubiquitin ligase complex acts by mediating ubiquitination of hypophosphorylated EIF4EBP1 (4E-BP1): ubiquitination and subsequent degradation of hypophosphorylated EIF4EBP1 (4E-BP1) probably serves as a homeostatic mechanism to maintain translation and prevent eIF4E inhibition when eIF4E levels are low (PubMed:22578813). The BCR(KLHL25) complex does not target EIF4EBP1 (4E-BP1) when it is hyperphosphorylated or

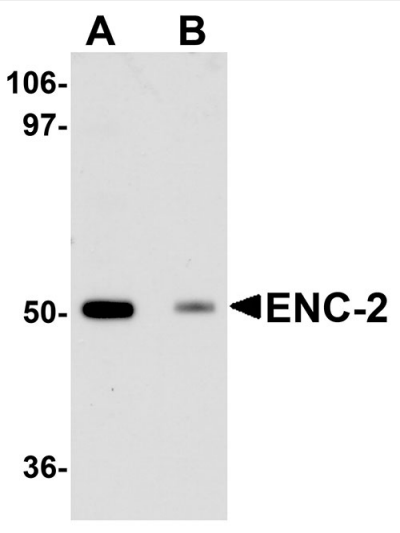
associated with eIF4E (PubMed:22578813). The BCR(KLHL25) complex also acts as a regulator of lipid synthesis by mediating ubiquitination and degradation of ACLY, thereby inhibiting lipid synthesis (PubMed:27664236, PubMed:34491895). BCR(KLHL25)-mediated degradation of ACLY promotes fatty acid oxidation and is required for differentiation of inducible regulatory T (iTreg) cells (PubMed:34491895).

ENC-2 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

ENC-2 Antibody - Images



Western blot analysis of ENC-2 in Jurkat cell lysate with ENC-2 antibody at 1 µg/mL in (A) the absence and (B) the presence of blocking peptide.

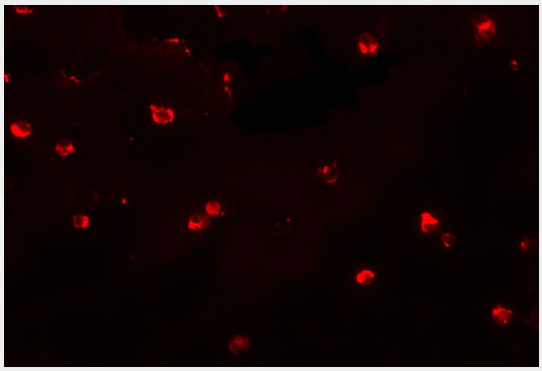
Immunocytochemistry of ENC-2 in Jurkat cells with ENC-2 antibody at 5 µg/mL.



Immunofluorescence of ENC-2 in Jurkat cells with ENC-2 antibody at 20 µg/mL.

ENC-2 Antibody - Background

ENC-2 Antibody: The ectoderm-neural cortex-2 (ENC-2) protein a member of the BTB/PDZ Kelch protein family displaying significant homology to ENC-1, an actin-binding protein involved in neural fate specification during embryogenesis and adipocyte maturation. The exact function of ENC-2 has yet to be determined, but it has been suggested to be involved in the differentiation of neuronal precursor cells into neurons and astrocytes.
