

SIK2 Antibody
Catalog # ASC11321**Specification****SIK2 Antibody - Product Information**

Application	WB, ICC, IF
Primary Accession	Q9H0K1
Other Accession	EAW67148 , 38569460
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Application Notes	SIK2 antibody can be used for detection of SIK2 by Western blot at 1 µg/mL.

SIK2 Antibody - Additional InformationGene ID **23235****Target/Specificity**

SIK2; SIK2 antibody is predicted to not cross-react with other SIK protein family members.

Reconstitution & Storage

SIK2 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Precautions

SIK2 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

SIK2 Antibody - Protein Information**Name** SIK2**Synonyms** KIAA0781 {ECO:0000312|EMBL:BAA34501.3},**Function**

Serine/threonine-protein kinase that plays a role in many biological processes such as fatty acid oxidation, autophagy, immune response or glucose metabolism (PubMed:23322770, PubMed:26983400). Phosphorylates 'Ser-794' of IRS1 in insulin-stimulated adipocytes, potentially modulating the efficiency of insulin signal transduction. Inhibits CREB activity by phosphorylating and repressing TORCs, the CREB-specific coactivators (PubMed:15454081). Phosphorylates EP300 and thus inhibits its histone acetyltransferase activity (PubMed:21084751, PubMed:26983400). In turn, regulates the DNA-binding ability of several transcription factors such as PPARA or MLXIPL

(PubMed:21084751,
PubMed:26983400).
Also plays a role in thymic T-cell development (By similarity).

Cellular Location

Cytoplasm. Endoplasmic reticulum membrane

SIK2 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

SIK2 Antibody - Images

Western blot analysis of SIK2 in SW480 cell lysate with SIK2 antibody at 1 µg/mL.

Immunocytochemistry of SIK2 in SW480 cells with SIK2 antibody at 2.5 µg/ml.

Immunofluorescence of SIK2 in SW480 cells with SIK2 antibody at 5 µg/ml.

SIK2 Antibody - Background

SIK2 Antibody: Salt-inducible kinase 2 (SIK2), like its closely related homolog SIK1, belongs AMPK subfamily of the Ser/Thr protein kinase family and negatively regulates CRE-binding protein (CREB) activity by phosphorylating the CREB-specific coactivator transducer of regulated CREB activity (TORC). SIK2 is thought to be part of a signaling cascade that regulates the expression and activity of the insulin-induced genes PGC-1 alpha and UCP-1 in brown adipocytes, impairment of which has been implicated in obesity and insulin resistance in human and animal models. SIK2 has also been reported as a key regulator for neuronal survival after ischemia, suppressing CREB-mediated gene expression after oxygen-glucose deprivation.
