

ORMDL1 Antibody
Catalog # ASC11327**Specification**

ORMDL1 Antibody - Product Information

Application	WB, IHC, IF
Primary Accession	Q9P0S3
Other Accession	NP_057551 , 189458852
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Application Notes	ORMDL1 antibody can be used for detection of ORMDL1 by Western blot at 1 - 2 µg/mL. Antibody can also be used for immunohistochemistry starting at 5 µg/mL. For immunofluorescence start at 20 µg/mL.

ORMDL1 Antibody - Additional InformationGene ID **94101****Target/Specificity**

ORMDL1; ORMDL1 antibody may cross-react with other ORMDL protein family members.

Reconstitution & Storage

ORMDL1 antibody can be stored at 4 °C, stable for one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Precautions

ORMDL1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

ORMDL1 Antibody - Protein Information**Name** ORMDL1**Function**

Plays an essential role in the homeostatic regulation of sphingolipid de novo biosynthesis by modulating the activity of the serine palmitoyltransferase (SPT) in response to ceramide levels (PubMed: [20182505](http://www.uniprot.org/citations/20182505)). When complexed to SPT, the binding of ceramides to its N-terminus stabilizes a conformation that block SPT substrate entry, hence preventing SPT catalytic activity. Through this mechanism, maintains ceramide levels at sufficient concentrations for the production of complex sphingolipids, but which prevents the accumulation of ceramides to levels that trigger apoptosis (By similarity).

Cellular Location

Endoplasmic reticulum membrane; Multi-pass membrane protein

Tissue Location

Widely expressed. Expressed in adult and fetal heart, brain, lung, liver, skeletal muscle and kidney. Expressed in adult pancreas and placenta and in fetal spleen and thymus. Expressed at intermediate level in pancreas, placenta and brain but low in skeletal muscle and lung.

ORMDL1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

ORMDL1 Antibody - Images

Western blot analysis of ORMDL1 in SK-N-SH Cell lysate with ORMDL1 antibody at (A) 1 µg/mL and (B) 2 µg/mL.

Immunohistochemistry of ORMDL1 in mouse brain tissue with ORMDL1 antibody at 5 µg/mL.

Immunofluorescence of ORMDL1 in mouse brain tissue with ORMDL1 antibody at 20 µg/mL.

ORMDL1 Antibody - Background

ORMDL1 Antibody: The ORMDL (ORM1-like) family of proteins consist of ORMDL1, ORMDL2 and ORMDL3 that may play roles in gamma-secretase complex maturation. Localized to the membrane of the endoplasmic reticulum, ORMDLs are widely expressed and are implicated in the expression of Presenilin (PSI) which is involved in Alzheimer's disease (AD). Expression of ORMDL1 is down-regulated in PSI mutations, suggesting a possible role as a therapeutic target for AD. ORMDLs have recently been identified as a potential risk factor for childhood asthma.
