

L1TD1 Antibody
Catalog # ASC11358**Specification**

L1TD1 Antibody - Product Information

Application	WB
Primary Accession	Q5T7N2
Other Accession	NP_061952 , 157694505
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Application Notes	L1TD1 antibody can be used for detection of L1TD1 by Western blot at 1 µg/mL.

L1TD1 Antibody - Additional InformationGene ID **54596****Target/Specificity**

L1TD1; L1TD1 antibody is predicted to not cross-react with other ECAT protein family members

Reconstitution & Storage

L1TD1 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Precautions

L1TD1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

L1TD1 Antibody - Images

Western blot analysis of L1TD1 in Jurkat cell lysate with L1TD1 antibody at 1 µg/mL in (A) the absence and (B) the presence of blocking peptide.

L1TD1 Antibody - Background

L1TD1 Antibody: L1TD1 (ECAT11) is a member of the family of Embryonic Stem Cell Associated Transcripts (ECAT) that play an important role in stem cell biology. ECAT4 (Nanog) is a master regulator for the maintenance of mESC and hESC. ECAT5 was identified to be Embryonic stem cell expressed Ras (ERas), a Ras-like oncogene that is important in regulating mESC proliferation. ECAT9 (GDF3) is an important factor that helps maintain mESC pluripotency by inhibiting bone morphogenetic protein (BMP) signaling. L1TD1 is highly enriched in undifferentiated hESC and L1TD1 is a target gene of Nanog.
