**Application Notes** 

**WB, IF** 000872

NP\_002456, 45976288 Human, Mouse, Rat

Rabbit Polyclonal

IgG

MYBPC1 antibody can be used for

detection of MYBPC1 by Western blot at 1  $\mu$ g/mL. Antibody can also be used for immunofluorescence starting at 20  $\mu$ g/mL. For immunofluorescence start at 20  $\mu$ g/mL.

# **MYBPC1** Antibody - Additional Information

Gene ID 4604

## Target/Specificity

MYBPC1; At least five isoforms of MYBPC1 are known to exist. MYBPC1 antibody is predicted not to cross-react with other MYBPC family members

# **Reconstitution & Storage**

MYBPC1 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

## **Precautions**

MYBPC1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

# **MYBPC1** Antibody - Protein Information

Name MYBPC1

**Synonyms MYBPCS** 

#### **Function**

Thick filament-associated protein located in the crossbridge region of vertebrate striated muscle a bands. Slow skeletal protein that binds to both myosin and actin (PubMed:<a href="http://www.uniprot.org/citations/31264822" target="\_blank">31264822</a>, PubMed:<a href="http://www.uniprot.org/citations/31025394" target="\_blank">31025394</a>). In vitro, binds to native thin filaments and modifies the activity of actin-activated myosin ATPase. May modulate muscle contraction or may play a more structural role.

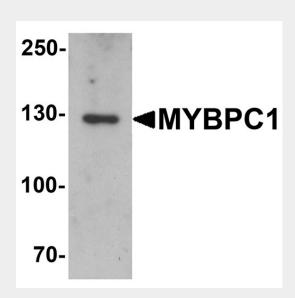

## **MYBPC1** Antibody - Protocols

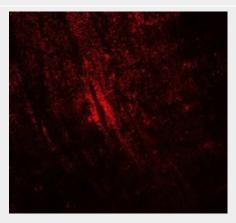

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

# **MYBPC1** Antibody - Images

Western blot analysis of MYBPC1 in rat skeletal muscle tissue lysate with MYBPC1 antibody at 1  $\mu$ g/mL.

Immunofluorescence of MYBPC1 in mouse skeletal muscle cells with MYBPC1 antibody at 20  $\mu g/mL$ .

# **MYBPC1** Antibody - Background

MYBPC1 Antibody: Myosin binding protein C (MYBPC) is a component of the thick filament of striated muscle, with the slow-type isoform designated MYBPC1. Both the fast-type (MYBPC2) and slow-type MYBPC protein contains seven immunoglobulin C2 motifs and three fibronectin type-III

Tel: 858.875.1900 Fax: 858.875.1999

repeats. Multiple isoforms of MYBPC1 are known to exist, and are present in varying amounts in different skeletal muscles. It is thought that the MYBPC1 slow subfamily may play important roles in the assembly and stabilization of sarcomeric M- and A-bands and regulate the contractile properties of the actomyosin filaments.
