

HHATL Antibody
Catalog # ASC11464**Specification**

HHATL Antibody - Product Information

Application	WB, IHC, IF
Primary Accession	Q9HCP6
Other Accession	NP_065758 , 239582769
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Application Notes	HHATL antibody can be used for detection of HHATL by Western blot at 1 µg/mL. Antibody can also be used for immunohistochemistry starting at 2.5 µg/mL. For immunofluorescence start at 2.5 µg/mL.

HHATL Antibody - Additional Information

Gene ID	57467
Target/Specificity	
HHATL;	

Reconstitution & Storage

HHATL antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Precautions

HHATL Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

HHATL Antibody - Protein Information

Name HHATL

Synonyms C3orf3, GUP1, KIAA1173

Function

Negatively regulates N-terminal palmitoylation of SHH by HHAT/SKN.

Cellular Location

Endoplasmic reticulum membrane; Multi-pass membrane protein

Tissue Location

Heart-specific..

HHATL Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

HHATL Antibody - Images

Western blot analysis of HHATL in 3T3 cell lysate with HHATL antibody at 1 μ g/mL.

Immunohistochemistry of HHATL in human skin tissue with HHATL antibody at 2.5 μ g/mL.

Immunofluorescence of HHATL in human skin tissue with HHATL antibody at 20 µg/mL.

HHATL Antibody - Background

HHATL Antibody: The Protein-cysteine N-palmitoyltransferase HHAT-like protein (HHATL), also known as the mammalian glycerol uptake/transporter 1 (Gup1) is a homolog of the *S. cerevisiae* Gup1. It is an endoplasmic reticulum (ER) membrane protein that co-localizes with the mammalian hedgehog acyltransferase Skn and interferes with its N-terminal palmitoylation of Sonic hedgehog (SHH), suggesting that HHATL acts as a negative regulator for N-terminal palmitoylation of SHH. HHATL is highly expressed in normal skin, but becomes down-regulated in skin squamous cell carcinoma, suggesting it may play a role in its development.
