

GRINA Antibody
Catalog # ASC11587**Specification**

GRINA Antibody - Product Information

Application	WB
Primary Accession	Q7Z429
Other Accession	NP_001009184 , 57165375
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Calculated MW	Predicted: 41 kDa KDa
Application Notes	GRINA antibody can be used for detection of GRINA by Western blot at 1 - 2 µg/mL.

GRINA Antibody - Additional Information

Gene ID 2907

Target/Specificity

GRINA; GRINA antibody is predicted to not cross-react with other members of the TMBIM family.

Reconstitution & Storage

GRINA antibody can be stored at 4°C for three months and -20°C, stable for up to one year.

Precautions

GRINA Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

GRINA Antibody - Protein Information**Name** GRINA**Synonyms** LFG1, NMDARA1, TMBIM3**Function**

Potential apoptotic regulator.

Cellular Location

Membrane; Multi-pass membrane protein

GRINA Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)

- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

GRINA Antibody - Images

Western blot analysis of GRINA in human testis tissue lysate with GRINA antibody at (A) 1 and (B) 2 μ g/mL.

GRINA Antibody - Background

GRINA Antibody: The transmembrane BAX inhibitor motif (TMBIM) family of proteins includes the founder member TMBIM6/BI-1, TMBIM1/RECS1 (responsive to centrifugal force and shear stress gene 1 protein), TMBIM2/LFG (life guard), TMBIM3/GRINA (glutamate receptor ionotropic NMDA protein 1), TMBIM4/GAAP (Golgi anti-apoptotic-associated protein), and TMBIM5/GHTIM (growth hormone-inducible transmembrane protein). They are highly conserved in mammals and zebrafish and contain a conserved BAX inhibitor-1 motif. GRINA is expressed in the brain and is a potential apoptotic regulator.
