

GRIP1 Antibody
Catalog # ASC11614**Specification****GRIP1 Antibody - Product Information**

Application	WB, IHC, IF
Primary Accession	Q9Y3R0
Other Accession	NP_066973 , 223890252
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Calculated MW	Predicted: 118 kDa KDa
Application Notes	GRIP1 antibody can be used for detection of GRIP1 by Western blot at 1 - 2 µg/mL.

GRIP1 Antibody - Additional Information

Gene ID	23426
Target/Specificity	
GRIP1;	

Reconstitution & Storage

GRIP1 antibody can be stored at 4°C for three months and -20°C, stable for up to one year.

Precautions

GRIP1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

GRIP1 Antibody - Protein Information

Name GRIP1

Function

May play a role as a localized scaffold for the assembly of a multiprotein signaling complex and as mediator of the trafficking of its binding partners at specific subcellular location in neurons (PubMed:10197531). Through complex formation with NSG1, GRIA2 and STX12 controls the intracellular fate of AMPAR and the endosomal sorting of the GRIA2 subunit toward recycling and membrane targeting (By similarity).

Cellular Location

Cytoplasmic vesicle. Perikaryon {ECO:0000250|UniProtKB:P97879}. Cell projection, dendrite {ECO:0000250|UniProtKB:P97879}. Cytoplasm {ECO:0000250|UniProtKB:P97879}. Endomembrane system {ECO:0000250|UniProtKB:P97879}; Peripheral membrane protein {ECO:0000250|UniProtKB:P97879}. Postsynaptic cell membrane {ECO:0000250|UniProtKB:P97879}. Postsynaptic density {ECO:0000250|UniProtKB:P97879}. Endoplasmic reticulum membrane; Peripheral membrane protein {ECO:0000250|UniProtKB:P97879}. Note=Membrane-associated with vesicles, peri-Golgi

complexes and endoplasmic reticulum. Enriched in postsynaptic plasma membrane and postsynaptic densities {ECO:0000250|UniProtKB:P97879}

GRIP1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

GRIP1 Antibody - Images

Western blot analysis of GRIP1 in HeLa cell lysate with GRIP1 antibody at 1 μ g/mL in (A) the absence and (B) the presence of blocking peptide.

Immunohistochemistry of GRIP1 in rat brain tissue with GRIP1 antibody at 2.5 µg/ml.

Immunofluorescence of GRIP1 in rat brain tissue with GRIP1 antibody at 20 µg/ml.

GRIP1 Antibody - Background

GRIP1 Antibody: Glutamate receptors play an important role in neural plasticity, development and degeneration. The glutamate receptor interacting proteins, GRIP1 and GRIP2, members of the PDZ domain-containing protein family, mediate the trafficking and membrane organization of a number of transmembrane proteins. GRIP1 and GRIP2 specifically bind to the AMPA receptor subunits, GluR 2/3 and are involved in the targeting of GluR 2/3 to the synapse. GRIP1 is expressed in early development before the expression of AMPA receptors, while GRIP2 expression parallels that of AMPA receptors during later developmental stages. GRIP1 and GRIP2 may be involved in the induction of cerebellar long-term depression (LTD).
