

SDPR Antibody
Catalog # ASC11628**Specification**

SDPR Antibody - Product Information

Application	WB, IHC, IF
Primary Accession	O95810
Other Accession	NP_004648 , 4759082
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Calculated MW	47 kDa KDa
Application Notes	SDPR antibody can be used for detection of SDPR by Western blot at 1 - 2 µg/mL.

SDPR Antibody - Additional InformationGene ID **8436****Target/Specificity**

SDPR; It is predicted to not cross-react with other members of the cavin family.

Reconstitution & Storage

SDPR antibody can be stored at 4°C for three months and -20°C, stable for up to one year.

Precautions

SDPR Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

SDPR Antibody - Protein InformationName CAVIN2 ([HGNC:10690](#))**Function**

Plays an important role in caveolar biogenesis and morphology. Regulates caveolae morphology by inducing membrane curvature within caveolae (PubMed:19525939). Plays a role in caveola formation in a tissue-specific manner. Required for the formation of caveolae in the lung and fat endothelia but not in the heart endothelia. Negatively regulates the size or stability of CAVIN complexes in the lung endothelial cells. May play a role in targeting PRKCA to caveolae (By similarity).

Cellular Location

Cytoplasm, cytosol. Membrane, caveola Note=Localizes in the caveolae in a caveolin-dependent manner

Tissue Location

Highly expressed in heart and lung, and expressed at lower levels in brain, kidney, liver, pancreas, placenta, and skeletal muscle.

SDPR Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

SDPR Antibody - Images

Western blot analysis of SDPR in HeLa cell lysate with SDPR antibody at (A) 1 and (B) 2 µg/mL

Immunohistochemistry of SDPR in spleen tissue with SDPR antibody at 5 µg/ml.

Immunofluorescence of SDPR in human spleen tissue with SDPR antibody at 20 µg/ml.

SDPR Antibody - Background

SDPR Antibody: The serum deprivation-response protein (SDPR) is a calcium-independent phospholipid-binding protein whose expression is increased in serum-starved cells. SDPR is a substrate for protein kinase C (PKC) phosphorylation and recruits the polymerase I and transcript release factor (PTRF) to caveolae. Removal of this protein causes caveolae loss and its over-expression results in caveolae deformation and membrane tubulation. Both SDPR and PTRF, as well as the other member of the cavin family PRKCDBP were down regulated in breast cancer cell lines and breast tumor tissue, suggesting that expression of the cavin family proteins could be a useful prognostic indicator of breast cancer progression.
