

Rift Valley Fever Virus Nucleocapsid Antibody

Catalog # ASC11673

Specification

Rift Valley Fever Virus Nucleocapsid Antibody - Product Information

Application

Primary Accession <u>Q9QKA6</u>

Other Accession <u>YP 003848707</u>, <u>302596926</u>

Reactivity

Host

Clonality

Polyclonal

lsotype IgG

Calculated MW Predicted: 27 kDa KDa

Application Notes RVF virus nucleocapsid antibody can detect 10ng RVF virus nucleocapsid

peptide in ELISA at 1 µg/mL.

Rift Valley Fever Virus Nucleocapsid Antibody - Additional Information

Gene ID **9538291**

Target/Specificity

NP:

Reconstitution & Storage

Rift Valley Fever Virus Nucleocapsid antibody can be stored at 4°C for three months and -20°C, stable for up to one year.

Precautions

Rift Valley Fever Virus Nucleocapsid Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Rift Valley Fever Virus Nucleocapsid Antibody - Protein Information

Rift Valley Fever Virus Nucleocapsid Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

Rift Valley Fever Virus Nucleocapsid Antibody - Background

Rift Valley Fever Virus Nucleocapsid Antibody: Rift Valley Fever (RFV) virus is an arthropod-borne virus endemic to Africa that infects humans and animals that is transmitted predominantly by mosquitoes (1). During human infections, symptoms can range from benign fever to severe encephalitis and fatal hepatitis with hemorrhagic fever. The Bunyaviridae family of viruses to which the RVF virus belongs are spherical enveloped viruses with a tripartite RNA genome of negative or ambisense polarity (2). The three segments are referred to as the L, M, and S segments. The L and M segments are negative polarity and code fore the L-dependent RNA polymerase and glycoprotein precursor respectively. The S segment is of ambisense polarity and encodes the nucleoprotein and non-structural proteins (3).
