

IL-1F10 Antibody
Catalog # ASC11709**Specification****IL-1F10 Antibody - Product Information**

Application	WB, IHC
Primary Accession	Q8WWZ1
Other Accession	NP_775184 , 27894307
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Calculated MW	Predicted: 17 kDa
Application Notes	Observed: 20 kDa KDa IL-1F10 antibody can be used for detection of IL-1F10 by Western blot at 1 - 2 µg/ml

IL-1F10 Antibody - Additional InformationGene ID **84639****Target/Specificity**

IL1F10; IL-1F10 antibody is human, mouse and rat reactive. Two isoforms of IL-1F10 exist.

Reconstitution & Storage

IL-1F10 antibody can be stored at 4°C for three months and -20°C, stable for up to one year.

Precautions

IL-1F10 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

IL-1F10 Antibody - Protein Information**Name** IL1F10 {ECO:0000312|MIM:615296}**Synonyms** FIL1T, IL1HY2, IL38**Function**

Cytokine with immunomodulatory activity. Alone, does not induce cytokine production, but reduces IL22 and IL17A production by T- cells in response to heat-killed *Candida albicans*. Reduces IL36G- induced production of IL8 by peripheral blood mononuclear cells. Increases IL6 production by dendritic cells stimulated by bacterial lipopolysaccharides (LPS). Ligand for IL-36R/IL1RL2.

Cellular Location

Cytoplasm. Secreted. Note=The secretion is dependent on protein unfolding and facilitated by the cargo receptor TMED10; it results in protein translocation from the cytoplasm into the ERGIC (endoplasmic reticulum-Golgi intermediate compartment) followed by vesicle entry and secretion.

Tissue Location

Expressed in fetal skin, spleen and tonsil. Expressed mostly in the basal epithelia of skin and in proliferating B- cells of the tonsil

IL-1F10 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

IL-1F10 Antibody - Images

Western blot analysis of IL-1F10 in human liver tissue lysate with IL-1F10 antibody at 1 μ g/ml in (A) the absence and (B) the presence of blocking peptide.

Immunohistochemistry of IL-1F10 in human spleen tissue with IL-1F10 antibody at 5 µg/mL.

IL-1F10 Antibody - Background

The cytokine IL-1 is responsible for initiating a variety of activities through the activation of transcription factors, NF-kappa B and AP-1, thereby promoting host response to injury or infection (1). IL-1F10 (Interleukin-1 family member 10), also known as FIL1T, IL1HY2 or FKSG75, is highly expressed in the skin, spleen and proliferating B-cells of the tonsil (2). IL-1F10 binds soluble IL-1 receptor type 1, and is one of nine Interleukin 1 families clustered on chromosome 2, where it is thought to participate in the regulation of adapted and innate immune responses (3). IL-1F10 and IL-1RN polymorphisms may play an important role in the susceptibility to developing rheumatoid arthritis (4).
