Application Notes

WB, IHC, IF

<u> 081X12</u>

NP_001028740, 75750480 Human, Mouse, Rat

Rabbit Polyclonal

IqG

Predicted: 76 kDa

Observed: 78 kDa KDa

RHOT1 antibody can be used for detection of RHOT1 by Western blot at $1 - 2 \mu g/ml$.

Antibody can also be used for

immunohistochemistry starting at 5 μ g/mL. For immunofluorescence start at 20 μ g/mL.

RHOT1 Antibody - Additional Information

Gene ID **55288**

Target/Specificity

RHOT1; RHOT1 antibody is human, mouse and rat reactive. At least three isoforms of RHOT1 are known to exist; this antibody will detect all three isoforms.

Reconstitution & Storage

RHOT1 antibody can be stored at 4°C for three months and -20°C, stable for up to one year.

Precautions

RHOT1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

RHOT1 Antibody - Protein Information

Name RHOT1

Synonyms ARHT1

Function

Mitochondrial GTPase involved in mitochondrial trafficking (PubMed: 12482879, PubMed:16630562, PubMed:22396657). Probably involved in control of anterograde transport of mitochondria and their subcellular distribution (PubMed:12482879, PubMed:16630562,

PubMed:22396657). Promotes mitochondrial fission during high calcium conditions (PubMed:27716788).

Cellular Location

Mitochondrion outer membrane; Single-pass type IV membrane protein. Note=Colocalizes with MGARP and RHOT2 at the mitochondria

Tissue Location

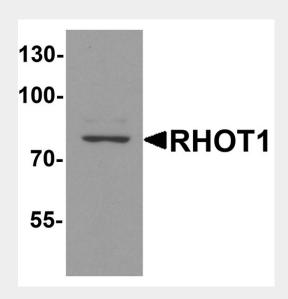

Ubiquitously expressed. Expressed at high level in heart and skeletal muscle.

RHOT1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

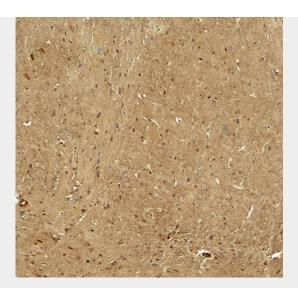

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

RHOT1 Antibody - Images

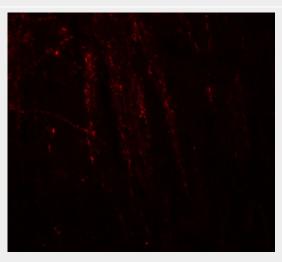

Western blot analysis of RHOT1 in rat brain tissue lysate with RHOT1 antibody at 1 µg/ml.

Immunohistochemistry of RHOT in mouse brain tissue with RHOT antibody at 5 µg/ml.

Immunofluorescence of RHOT in mouse brain tissue with RHOT antibody at 20 µg/ml.

RHOT1 Antibody - Background

The Ras homolog family member T1 (RHOT) is an atypical Rho Ca2+-binding GTPase that localizes to the mitochondria (1). RHOT1, the related protein RHOT2, the adaptor protein Milton, and the PTEN induced putative kinase 1 (PINK1), form a complex that is involved in axonal transport of mitochondria (2,3). Both PINK1 and Parkin target RHOT1 for phosphorylation and degradation, causing the arrest of mitochondrial motility (4).
