

JAG1 Antibody

Catalog # ASC11880

Specification

JAG1 Antibody - Product Information

Application WB, IHC, IF Primary Accession P78504

Other Accession
Reactivity
Host
Reactivity

Clonality Polyclonal Isotype IgG

Calculated MW Predicted: 134 kDa

Observed: 130 kDa KDa

Application Notes JAG1 antibody can be used for detection of

JAG1 by Western blot at 1 - 2 μg/ml.

Antibody can also be used for

immunohistochemistry starting at 5 $\mu g/mL$. For immunofluorescence start at 20 $\mu g/mL$.

JAG1 Antibody - Additional Information

Gene ID 182

Target/Specificity

JAG1; JAG1 antibody is human, mouse and rat reactive. At least two isoforms of JAG1 are known to exist; this antibody will detect both isoforms.

Reconstitution & Storage

JAG1 antibody can be stored at 4°C for three months and -20°C, stable for up to one year.

Precautions

JAG1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

JAG1 Antibody - Protein Information

Name JAG1

Synonyms JAGL1

Function

Ligand for multiple Notch receptors and involved in the mediation of Notch signaling (PubMed:18660822, PubMed:20437614). May be involved in cell-fate decisions during hematopoiesis (PubMed:9462510). Seems to be involved in early and late stages of mammalian cardiovascular development. Inhibits myoblast differentiation (By similarity). Enhances fibroblast growth factor-induced angiogenesis (in vitro).

Cellular Location

Membrane; Single-pass type I membrane protein. Cell membrane

Tissue Location

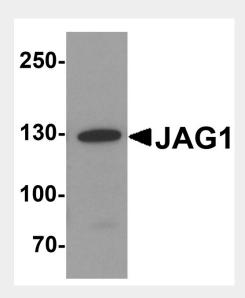

Widely expressed in adult and fetal tissues. In cervix epithelium expressed in undifferentiated subcolumnar reserve cells and squamous metaplasia. Expression is up-regulated in cervical squamous cell carcinoma. Expressed in bone marrow cell line HS-27a which supports the long-term maintenance of immature progenitor cells

JAG1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

JAG1 Antibody - Images

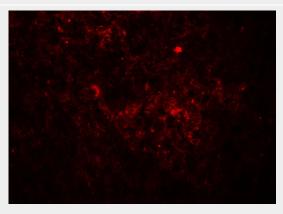

Western blot analysis of JAG1 in HeLa cell lysate with JAG1 antibody at $1 \mu g/ml$.

Immunohistochemistry of JAG1 in human spleen tissue with JAG1 antibody at 5 μg/ml.

Immunofluorescence of JAG1 in human spleen tissue with JAG1 antibody at 20 μg/ml.

JAG1 Antibody - Background

The LIN-12/Notch family of transmembrane receptors plays a central role in development by regulating cell fate decisions (1). Ligands for Notch include JAG1, JAG2 and Delta. JAG1 is one of the DSL (Delta, Serrate, Lag2) transmembrane proteins that can activate Notch. It is involved in mammalian cardiovascular development and in cell-fate decisions during hematopoiesis (1,2). JAG1 is widely expressed in adult and fetal tissues and the mutation of the JAG1 gene is associated with Familial Tetrology of Fallot (3). JAG1 expression is associated with prostate cancer metastasis and is up-regulated in cervical squamous cell carcinoma (4,5).
