

ADORA2B Antibody

Catalog # ASC11898

Specification

ADORA2B Antibody - Product Information

Application Primary Accession Other Accession Reactivity Host Clonality Isotype Calculated MW WB, IHC, IF <u>P29275</u> <u>NP_000667</u>, <u>4501951</u> Human, Mouse, Rat Rabbit Polyclonal IgG Predicted: 37 kDa

Observed: 41 kDa KDa ADORA2B antibody can be used for detection of ADORA2B by Western blot at 0.5 - 1 µg/mL. Antibody can also be used for immunohistochemistry starting at 5 µg/mL. For immunofluorescence start at 20 µg/mL.

Application Notes

ADORA2B Antibody - Additional Information

Gene ID 136 Target/Specificity ADORA2B; ADORA2B antibody is human, mouse and rat reactive. At least two isoforms of ADORA2B are known to exist; this antibody will detect both isoforms. ADORA2B antibody is predicted to not cross-react with ADORA2A.

Reconstitution & Storage

Antibody can be stored at 4°C up to one year. Antibodies should not be exposed to prolonged high temperatures.

Precautions

ADORA2B Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

ADORA2B Antibody - Protein Information

Name ADORA2B

Function

Receptor for adenosine. The activity of this receptor is mediated by G proteins which activate adenylyl cyclase.

Cellular Location

Cell membrane; Multi-pass membrane protein.

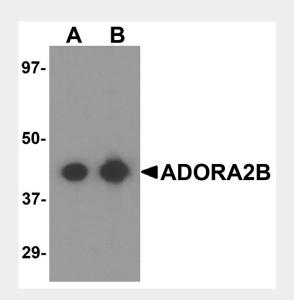

ADORA2B Antibody - Protocols

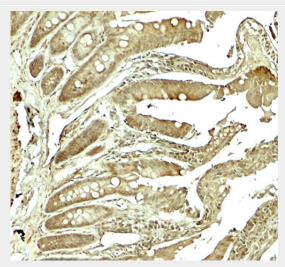

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

ADORA2B Antibody - Images

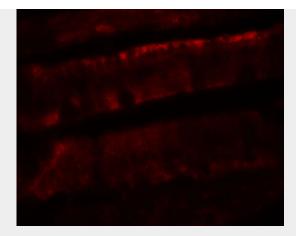

Western blot analysis of ADORA2B in mouse colon tissue lysate with ADORA2B antibody at (A) 0.5 and (B) $1 \mu g/ml$.

Immunohistochemistry of ADORA2B in rat colon tissue with ADORA2B antibody at 5 µg/mL.

Immunofluorescence of ADORA2B in rat colon tissue with ADORA2B antibody at 20 µg/mL.

ADORA2B Antibody - Background

The adenosine receptor ADORA2B is a member of the G protein-coupled receptor superfamily and is an integral membrane protein that stimulates adenylate cyclase activity in the presence of adenosine (1,2). Extracellular adenosine triggers a potent anti-inflammatory response that is mediated in part by ADORA2B including the stimulation of IL-10 production (3-5). Activation of ADORA2B can also enhance the abundance of regulatory T cells (Tregs), a class of cells that work to constrain inflammation (6).
