

Mouse IgG1 isotype control Texas Red™

Monoclonal MG1 IgG1 , Texas Red® Catalog # ASR1284

Specification

Conjugate

Mouse IgG1 isotype control Texas Red™ - Product Information

Description MOUSE IgG1 isotype control Texas Red™

conjugated Texas Red®

FP Value 2.1 moles Texas Red® per mole of Mouse

laG1

,4,

Clonality Monoclonal

Application

Application Note FlowCytometry 1:1000-1:5000
Physical State Lyophilized
Host Isotype IgG1

Buffer 0.02 M Potassium Phosphate, 0.5 M

Sodium Chloride, pH 7.2

Species of Origin Mouse Reconstitution Volume 100 μ L

Reconstitution Buffer Restore with deionized water (or

equivalent)

Stabilizer 10 mg/mL Bovine Serum Albumin (BSA) -

Immunoglobulin and Protease free

Preservative 0.01% (w/v) Sodium Azide

Mouse IgG1 isotype control Texas Red™ - Additional Information

Shipping Condition

Ambient

Purity

This product has been prepared from mouse ascitic fluid by immunoaffinity chromatography using protein A. In an Ouchterlony double diffusion assay the material is non-reactive with antisera to mouse IgG2a , IgG3 , IgM , and IgA. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Mouse IgG and anti-Mouse serum.

Storage Condition

Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Precautions Note

This product is for research use only and is not intended for therapeutic or diagnostic applications.

Mouse IgG1 isotype control Texas Red™ - Protein Information

Mouse IgG1 isotype control Texas Red™ - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

Mouse IgG1 isotype control Texas Red™ - Background

Isotype control Mouse IgG1 is important for Flow Cytometry. Mouse IgG1 control has no specificity for target cells within a particular experiment. Their purpose is to confirm the specificity of primary antibody binding that it is not a result of non-specific Fc receptor binding to cells or other cellular protein interactions. Isotype controls need to be matched to the specific primary Abs (species and isotype, including heavy and light chains) being used.
