Purity
This product was prepared from monospecific antiserum by immunoaffinity chromatography using Rat IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Rabbit Serum, Rat IgG and Rat Serum.

Storage Condition
Store vial at $4^{\circ} \mathrm{C}$ prior to restoration. For extended storage aliquot contents and freeze at $-20^{\circ} \mathrm{C}$ or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at $4^{\circ} \mathrm{C}$ as an undiluted liquid. Dilute only prior to immediate use.
