

Anti-Chicken Serum Secondary Antibody
Rabbit Polyclonal, Unconjugated
Catalog # ASR1524**Specification**

Anti-Chicken Serum Secondary Antibody - Product Information

Description	Anti-CHICKEN SERUM (RABBIT) Antibody
Host	Rabbit
Conjugate	Unconjugated
Target Species	Chicken
Reactivity	Chicken
Clonality	Polyclonal
Physical State	Lyophilized
Host Isotype	Antiserum
Buffer	0.01 M Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Immunogen	Anti-Chicken serum antibody was produced by repeated immunizations with Chicken serum proteins.
Reconstitution Volume	2.0 mL
Reconstitution Buffer	Restore with deionized water (or equivalent)
Stabilizer	None
Preservative	0.01% (w/v) Sodium Azide

Anti-Chicken Serum Secondary Antibody - Additional Information**Shipping Condition**

Ambient

Purity

Anti-Chicken serum antibody was prepared from polyspecific antiserum by a delipidation and defibrination. Assay by immunoelectrophoresis resulted in multiple precipitin arcs against Chicken Serum.

Storage Condition

Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Precautions Note

This product is for research use only and is not intended for therapeutic or diagnostic applications.

Anti-Chicken Serum Secondary Antibody - Background

Anti-Chicken serum antibody detects chicken serum proteins. Serum proteins are those proteins remaining in portion of plasma after coagulation of blood, during which process the plasma protein fibrinogen is converted to fibrin and remains behind in the clot. Anti-Bovine serum antibody is ideal for investigators involved in Cell Signaling, cellular biology and Signal Transduction research.
