

Anti-Horse Serum Secondary Antibody
Rabbit Polyclonal, Unconjugated
Catalog # ASR1529**Specification**

Anti-Horse Serum Secondary Antibody - Product Information

Description	Anti-HORSE SERUM (RABBIT) Antibody
Host	Rabbit
Conjugate	Unconjugated
Target Species	Horse
Clonality	Polyclonal
Physical State	Lyophilized
Host Isotype	Antiserum
Buffer	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Immunogen	Anti-Horse serum antibody was produced by repeated immunizations with horse serum proteins.
Reconstitution Volume	2.0 mL
Reconstitution Buffer	Restore with deionized water (or equivalent)
Stabilizer	None
Preservative	0.01% (w/v) Sodium Azide

Anti-Horse Serum Secondary Antibody - Additional Information**Shipping Condition**

Ambient

Purity

Anti-Horse serum antibody was prepared from polyspecific antiserum by a delipidation and defibrination. Assay by immunoelectrophoresis resulted in multiple precipitin arcs against Horse Serum.

Storage Condition

Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Precautions Note

This product is for research use only and is not intended for therapeutic or diagnostic applications.

Anti-Horse Serum Secondary Antibody - Background

Anti-Horse serum antibody detects horse serum proteins. Horse serum proteins are proteins in the portion of plasma remaining after coagulation of blood, during which process the plasma protein fibrinogen is converted to fibrin and remains behind in the clot. Anti-Horse serum antibody is ideal for investigators involved in Cell biology, Neuroscience and Signal Transduction research.
