

Mouse IgG2a Lambda (λ) isotype Control
Monoclonal M2AL IgG2a , Unconjugated
Catalog # ASR2268**Specification**

Mouse IgG2a Lambda (λ) isotype Control - Product Information

Description	MOUSE IgG2a Lambda (λ) isotype control
Conjugate	Unconjugated
Clonality	Monoclonal
Application	,4,
Application Note	FlowCytometry 1:1000-1:5000
Physical State	Liquid (sterile filtered)
Host Isotype	IgG2a
Buffer	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Species of Origin	Mouse
Stabilizer	None
Preservative	0.01% (w/v) Sodium Azide

Mouse IgG2a Lambda (λ) isotype Control - Additional Information**Shipping Condition**

Wet Ice

Purity

Mouse Isotype control has been prepared from concentrated cell culture supernatant by immunoaffinity chromatography using protein A. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Mouse IgG and anti-Mouse serum. By ELISA, the material is non-reactive with antibodies to mouse IgG1, IgG2b, IgG3, IgM and IgA. Light and heavy chain composition confirmed by ELISA.

Storage Condition

Store vial at 4° C prior to opening. This product is stable 4° C as an undiluted liquid. Dilute only prior to immediate use. For extended storage mix with an equal volume of glycerol, aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing.

Precautions Note

This product is for research use only and is not intended for therapeutic or diagnostic applications.

Mouse IgG2a Lambda (λ) isotype Control - Background

Mouse isotype controls are used in flow cytometry, western blot and ELISA and differentiate between immunoglobulin classes and subclasses. Isotype controls allow for the genetic variations or differences in the constant regions of the heavy and light chains. In mouse there are six relevant heavy chain isotypes and two light chain isotypes: heavy chain α - IgA, γ - IgG 1, 2a, 2b, 3 and μ - IgM, light chain κ and λ .
