

## Swine IgG F(c) Rhodamine

Catalog # ASR2577

## **Specification**

Host Isotype

Species of Origin

Reconstitution Volume

Reconstitution Buffer

# Swine IgG F(c) Rhodamine - Product Information

Description SWINE IgG F(c) fragment Rhodamine

conjugated

Conjugate Rhodamine (TRITC)
Physical State Lyophilized

Lyophilized IgG F(c)

Buffer 0.02 M Potassium Phosphate, 0.15 M

Sodium Chloride, pH 7.2

Swine 1.0 mL

Restore with deionized water (or

equivalent)

Stabilizer 10 mg/mL Bovine Serum Albumin (BSA) -

Immunoglobulin and Protease free

Preservative 0.01% (w/v) Sodium Azide

# Swine IgG F(c) Rhodamine - Additional Information

# **Shipping Condition**

**Ambient** 

#### Purity

This product was prepared from normal serum by delipidation, salt fractionation, ion exchange chromatography followed by papain digestion and extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Swine  $\lg G$ , anti-Swine  $\lg G F(c)$  and anti-Swine Serum. No reaction was observed against anti-Swine  $\lg G F(ab') = 1$ 0 or anti-Papain.

### **Storage Condition**

Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

## **Precautions Note**

This product is for research use only and is not intended for therapeutic or diagnostic applications.

Swine IgG F(c) Rhodamine - Background

This product is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms.
