Purity

This product was prepared from normal serum by delipidation, salt fractionation and ion change chromatography followed by trypsin digestion and extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Rhodamine, anti-Human IgM Fc5 μ and anti-Human Serum. No reaction was observed against anti-Human IgG F(ab')₂ or anti-Trypsin.

Storage Condition

Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
