

CENPJ Antibody (monoclonal) (M01)**Mouse monoclonal antibody raised against a partial recombinant CENPJ.****Catalog # AT1494a****Specification**

CENPJ Antibody (monoclonal) (M01) - Product Information

Application	WB, IHC, E
Primary Accession	O9HC77
Other Accession	NM_018451
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG2a Kappa
Calculated MW	153000

CENPJ Antibody (monoclonal) (M01) - Additional Information**Gene ID** 55835**Other Names**

Centromere protein J, CENP-J, Centrosomal P41-associated protein, LAG-3-associated protein, LYST-interacting protein 1, CENPJ, CPAP, LAP, LIP1

Target/Specificity

CENPJ (NP_060921, 979 a.a. ~ 1088 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB~~1:500~1000

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

CENPJ Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

CENPJ Antibody (monoclonal) (M01) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)

- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

CENPJ Antibody (monoclonal) (M01) - Images

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (37.84 kDa) .

Immunoperoxidase of monoclonal antibody to CENPJ on formalin-fixed paraffin-embedded human pancreas. [antibody concentration 1.5 ug/ml]

Detection limit for recombinant GST tagged CENPJ is approximately 0.03ng/ml as a capture antibody.

CENPJ Antibody (monoclonal) (M01) - Background

This gene encodes a protein that belongs to the centromere protein family. During cell division, this protein plays a structural role in the maintenance of centrosome integrity and normal spindle morphology, and it is involved in microtubule disassembly at the centrosome. This protein can function as a transcriptional coactivator in the Stat5 signaling pathway, and also as a coactivator of NF-kappaB-mediated transcription, likely via its interaction with the coactivator p300/CREB-binding protein. Mutations in this gene are associated with primary autosomal recessive microcephaly, a disorder characterized by severely reduced brain size and mental retardation.
