Western Blot analysis of GAP43 expression in transfected 293T cell line by GAP43 monoclonal antibody (M01), clone 3C11.

Lane 1: GAP43 transfected lysate (24.8 kDa).

Lane 2: Non-transfected lysate.

Detection limit for recombinant GST tagged GAP43 is approximately 3ng/ml as a capture antibody.

### **GAP43 Antibody (monoclonal) (M01) - Background**

The protein encoded by this gene has been termed a 'growth' or 'plasticity' protein because it is expressed at high levels in neuronal growth cones during development and axonal regeneration. This protein is considered a crucial component of an effective regenerative response in the nervous system. Alternatively spliced transcript variants encoding distinct isoforms have been found for this gene.
