

IMP-3 Antibody (monoclonal) (M01)**Mouse monoclonal antibody raised against a full-length recombinant IMP-3.****Catalog # AT2528a****Specification**

IMP-3 Antibody (monoclonal) (M01) - Product Information

Application	WB
Primary Accession	O00425
Other Accession	BC065269
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	IgM Kappa
Calculated MW	63705

IMP-3 Antibody (monoclonal) (M01) - Additional Information**Gene ID** 10643**Other Names**

Insulin-like growth factor 2 mRNA-binding protein 3, IGF2 mRNA-binding protein 3, IMP-3, IGF-II mRNA-binding protein 3, KH domain-containing protein overexpressed in cancer, hKOC, VICKZ family member 3, IGF2BP3, IMP3, KOC1, VICKZ3

Target/Specificity

IMP-3 (AAH65269, 1 a.a. ~ 579 a.a) full-length recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB~~1:500~1000

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

IMP-3 Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

IMP-3 Antibody (monoclonal) (M01) - Protocols

Provided below are standard protocols that you may find useful for product applications.

IMP-3 Antibody (monoclonal) (M01) - Background

The protein encoded by this gene is primarily found in the nucleolus, where it can bind to the 5' UTR of the insulin-like growth factor II leader 3 mRNA and may repress translation of insulin-like growth factor II during late development. The encoded protein contains several KH domains, which are important in RNA binding and are known to be involved in RNA synthesis and metabolism. A pseudogene exists on chromosome 7, and there are putative pseudogenes on other chromosomes.
