KCNA3 Antibody (monoclonal) (M01)

Mouse monoclonal antibody raised against a partial recombinant KCNA3.
Catalog # AT2590a

Specification

KCNA3 Antibody (monoclonal) (M01) - Product Information

Application	**WB, E**
Primary Accession	P22001
Other Accession	BC035059
Reactivity	**Human**
Host	**mouse**
Clonality	**Monoclonal**
Isotype	**IgG1 Kappa**
Calculated MW	**63842**

KCNA3 Antibody (monoclonal) (M01) - Additional Information

Gene ID 3738

Other Names
Potassium voltage-gated channel subfamily A member 3, HGK5, HLK3, HPCN3, Voltage-gated K(+) channel HuKIII, Voltage-gated potassium channel subunit Kv13, KCNA3, HGK5

Target/Specificity
KCNA3 (AAH35059, 424 a.a. ~ 523 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution
WB~~1:500~1000

Format
Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage
Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions
KCNA3 Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

KCNA3 Antibody (monoclonal) (M01) - Protocols

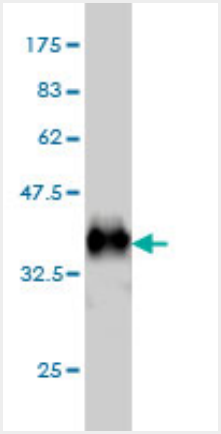

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot

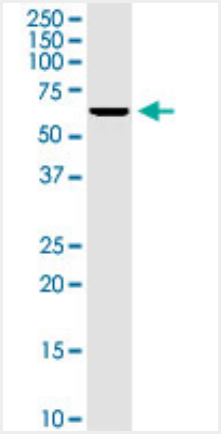

10320 Camino Santa Fe, Suite G
San Diego, CA 92121
Tel: 858.875.1900 Fax: 858.875.1999

- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

KCNA3 monoclonal antibody (M01), clone 1D8 Western Blot analysis of KCNA3 expression in Hela S3 NE ((Cat # AT2590a)

KCNA3 monoclonal antibody (M01), clone 1D8. Western Blot analysis of KCNA3 expression in Jurkat.

Detection limit for recombinant GST tagged KCNA3 is approximately 0.03ng/ml as a capture antibody.

KCNA3 Antibody (monoclonal) (M01) - Background

Potassium channels represent the most complex class of voltage-gated ion channels from both functional and structural standpoints. Their diverse functions include regulating neurotransmitter release, heart rate, insulin secretion, neuronal excitability, epithelial electrolyte transport, smooth muscle contraction, and cell volume. Four sequence-related potassium channel genes - shaker, shaw, shab, and shal - have been identified in Drosophila, and each has been shown to have human homolog(s). This gene encodes a member of the potassium channel, voltage-gated, shaker-related subfamily. This member contains six membrane-spanning domains with a shaker-type repeat in the fourth segment. It belongs to the delayed rectifier class, members of which allow nerve cells to efficiently repolarize following an action potential. It plays an essential role in T-cell proliferation and activation. This gene appears to be intronless and it is clustered together with KCNA2 and KCNA10 genes on chromosome 1.
