

MMP26 Antibody (monoclonal) (M01)

Mouse monoclonal antibody raised against a partial recombinant MMP26.

Catalog # AT2881a

Specification

MMP26 Antibody (monoclonal) (M01) - Product Information

Application	WB, E
Primary Accession	O9NRE1
Other Accession	NM_021801
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG2a Kappa
Calculated MW	29708

MMP26 Antibody (monoclonal) (M01) - Additional Information

Gene ID 56547

Other Names

Matrix metalloproteinase-26, MMP-26, 3424-, Endometase, Matrilysin-2, MMP26

Target/Specificity

MMP26 (NP_068573, 152 a.a. ~ 261 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB~~1:500~1000

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

MMP26 Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

MMP26 Antibody (monoclonal) (M01) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)

- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

MMP26 Antibody (monoclonal) (M01) - Images

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (37.84 kDa) .

MMP26 monoclonal antibody (M01), clone 6C6. Western Blot analysis of MMP26 expression in HeLa (Cat # AT2881a)

MMP26 monoclonal antibody (M01), clone 6C6 Western Blot analysis of MMP26 expression in

HL-60 ((Cat # AT2881a)

Detection limit for recombinant GST tagged MMP26 is approximately 1ng/ml as a capture antibody.

MMP26 Antibody (monoclonal) (M01) - Background

Proteins of the matrix metalloproteinase (MMP) family are involved in the breakdown of extracellular matrix in normal physiological processes, such as embryonic development, reproduction, and tissue remodeling, as well as in disease processes, such as arthritis and metastasis. Most MMP's are secreted as inactive proproteins which are activated when cleaved by extracellular proteinases. The encoded protein degrades type IV collagen, fibronectin, fibrinogen, casein, vitronectin, alpha 1-antitrypsin, alpha 2-macroglobulin, and insulin-like growth factor-binding protein 1, and activates MMP9 by cleavage. The protein differs from most MMP family members in that it lacks a conserved C-terminal protein domain.
