

## MPP1 Antibody (monoclonal) (M01)

Mouse monoclonal antibody raised against a full length recombinant MPP1. Catalog # AT2893a

#### Specification

## MPP1 Antibody (monoclonal) (M01) - Product Information

Application Primary Accession Other Accession Reactivity Host Clonality Isotype Calculated MW IF, IP, WB, E <u>Q00013</u> <u>BC002392</u> Human mouse Monoclonal IgG1 Kappa 52296

## MPP1 Antibody (monoclonal) (M01) - Additional Information

Gene ID 4354

**Other Names** 55 kDa erythrocyte membrane protein, p55, Membrane protein, palmitoylated 1, MPP1, DXS552E, EMP55

**Target/Specificity** MPP1 (AAH02392, 1 a.a. ~ 466 a.a) full-length recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

**Dilution** WB~~1:500~1000

**Format** Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

**Precautions** MPP1 Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

#### MPP1 Antibody (monoclonal) (M01) - Protocols

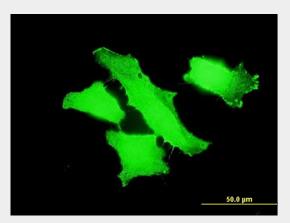

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot

- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

Immunoprecipitation of MPP1 transfected lysate using anti-MPP1 monoclonal antibody and Protein A Magnetic Bead (<u>U0007</u>), and immunoblotted with MPP1 monoclonal antibody.

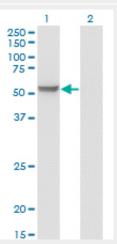

Antibody Reactive Against Recombinant Protein.Western Blot detection against Immunogen (77

KDa).

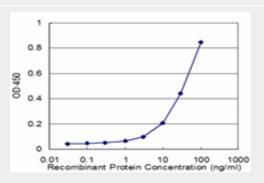

MPP1 monoclonal antibody (M01), clone 1E11-1G11. Western Blot analysis of MPP1 expression in human placenta.

Western Blot analysis of MPP1 expression in transfected 293T cell line by MPP1 monoclonal antibody (M01), clone 1E11-1G11.

Lane 1: MPP1 transfected lysate (Predicted MW: 52.3 KDa). Lane 2: Non-transfected lysate.

Detection limit for recombinant GST tagged MPP1 is approximately 1ng/ml as a capture antibody. MPP1 Antibody (monoclonal) (M01) - Background

This gene encodes the prototype of the membrane-associated guanylate kinase (MAGUK) family proteins. MAGUKs interact with the cytoskeleton and regulate cell proliferation, signaling pathways,

and intercellular junctions. The encoded protein is an extensively palmitoylated membrane phosphoprotein containing a PDZ domain, a Src homology 3 (SH3) motif, and a guanylate kinase domain. This gene product interacts with various cytoskeletal proteins and cell junctional proteins in different tissue and cell types, and may be involved in the regulation of cell shape, hair cell development, neural patterning of the retina, and apico-basal polarity and tumor suppression pathways in non-erythroid cells. Multiple transcript variants encoding different isoforms have been found for this gene.
