

PAPPA Antibody (monoclonal) (M01)**Mouse monoclonal antibody raised against a partial recombinant PAPPA.****Catalog # AT3178a****Specification**

PAPPA Antibody (monoclonal) (M01) - Product Information

Application	WB
Primary Accession	Q13219
Other Accession	NM_002581
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG2b Kappa
Calculated MW	180973

PAPPA Antibody (monoclonal) (M01) - Additional Information**Gene ID** 5069**Other Names**

Pappalysin-1, Insulin-like growth factor-dependent IGF-binding protein 4 protease, IGF-dependent IGFBP-4 protease, IGFBP-4ase, Pregnancy-associated plasma protein A, PAPP-A, PAPPA

Target/Specificity

PAPPA (NP_002572, 85 a.a. ~ 194 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB~~1:500~1000

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

PAPPA Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

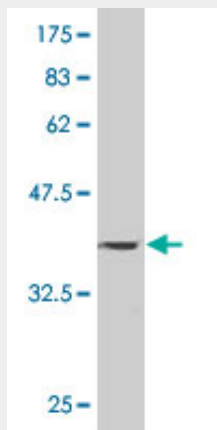

PAPPA Antibody (monoclonal) (M01) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)

- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

PAPPA Antibody (monoclonal) (M01) - Images

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (37.84 kDa) .

PAPPA Antibody (monoclonal) (M01) - Background

This gene encodes a secreted metalloproteinase which cleaves insulin-like growth factor binding proteins (IGFBPs). It is thought to be involved in local proliferative processes such as wound healing and bone remodeling. Low plasma level of this protein has been suggested as a biochemical marker for pregnancies with aneuploid fetuses.
