

**PEPD Antibody (monoclonal) (M01)****Mouse monoclonal antibody raised against a full length recombinant PEPD.****Catalog # AT3268a****Specification**

---

**PEPD Antibody (monoclonal) (M01) - Product Information**

Application	IF, IP, WB, E
Primary Accession	<a href="#">P12955</a>
Other Accession	<a href="#">BC015027</a>
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG1 Kappa
Calculated MW	54548

**PEPD Antibody (monoclonal) (M01) - Additional Information****Gene ID** 5184**Other Names**

Xaa-Pro dipeptidase, X-Pro dipeptidase, Imidodipeptidase, Peptidase D, Proline dipeptidase, Prolidase, PEPD, PRD

**Target/Specificity**

PEPD (AAH15027, 1 a.a. ~ 493 a.a) full-length recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

**Dilution**

WB~~1:500~1000

**Format**

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

**Storage**

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

**Precautions**

PEPD Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

**PEPD Antibody (monoclonal) (M01) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)

- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

## PEPD Antibody (monoclonal) (M01) - Images

Immunofluorescence of monoclonal antibody to PEPD on HepG2 cell. [antibody concentration 10 ug/ml]

Immunoprecipitation of PEPD transfected lysate using anti-PEPD monoclonal antibody and Protein A Magnetic Bead ([U0007](#)), and immunoblotted with PEPD MaxPab rabbit polyclonal antibody.

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen

(79.97 KDa) .

PEPD monoclonal antibody (M01), clone 1D5-H3 Western Blot analysis of PEPD expression in HepG2 (Cat # AT3268a)

Western Blot analysis of PEPD expression in transfected 293T cell line by PEPD monoclonal antibody (M01), clone 1D5-H3.

Lane 1: PEPD transfected lysate (Predicted MW: 54.6 KDa).  
Lane 2: Non-transfected lysate.

Detection limit for recombinant GST tagged PEPD is approximately 0.1ng/ml as a capture antibody.

### PEPD Antibody (monoclonal) (M01) - Background

This gene encodes a member of the peptidase family. The protein forms a homodimer that

hydrolyzes dipeptides or tripeptides with C-terminal proline or hydroxyproline residues. The enzyme serves an important role in the recycling of proline, and may be rate limiting for the production of collagen. Mutations in this gene result in prolydase deficiency, which is characterized by the excretion of large amount of di- and tri-peptides containing proline. Multiple transcript variants encoding different isoforms have been found for this gene.
