

**PML Antibody (monoclonal) (M02)****Mouse monoclonal antibody raised against a partial recombinant PML.****Catalog # AT3354a****Specification**

---

**PML Antibody (monoclonal) (M02) - Product Information**

Application	IF, WB, E
Primary Accession	<a href="#">P29590</a>
Other Accession	<a href="#">BC000080</a>
Reactivity	Human, Rat
Host	mouse
Clonality	Monoclonal
Isotype	IgG2a Kappa
Calculated MW	97551

**PML Antibody (monoclonal) (M02) - Additional Information****Gene ID** 5371**Other Names**

Protein PML, Promyelocytic leukemia protein, RING finger protein 71, Tripartite motif-containing protein 19, PML, MYL, PP8675, RNF71, TRIM19

**Target/Specificity**

PML (AAH00080, 411 a.a. ~ 510 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

**Dilution**

WB~~1:500~1000

**Format**

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

**Storage**

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

**Precautions**

PML Antibody (monoclonal) (M02) is for research use only and not for use in diagnostic or therapeutic procedures.

**PML Antibody (monoclonal) (M02) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

## PML Antibody (monoclonal) (M02) - Images

Immunofluorescence of monoclonal antibody to PML on HeLa cell. [antibody concentration 10 ug/ml]

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (36.63 KDa) .

PML monoclonal antibody (M02), clone 1D12. Western Blot analysis of PML expression in

PC-12((Cat # AT3354a )

PML monoclonal antibody (M02), clone 1D12 Western Blot analysis of PML expression in HeLa S3 NE (Cat # AT3354a )

Detection limit for recombinant GST tagged PML is approximately 0.3ng/ml as a capture antibody.

Proximity Ligation Analysis of protein-protein interactions between TP53 and PML HeLa cells were stained with anti-TP53 rabbit purified polyclonal 1:1200 and anti-PML mouse monoclonal antibody 1:50. Each red dot represents the detection of protein-protein interaction complex, and nuclei were counterstained with DAPI (blue).

#### **PML Antibody (monoclonal) (M02) - Background**

The protein encoded by this gene is a member of the tripartite motif (TRIM) family. The TRIM motif includes three zinc-binding domains, a RING, a B-box type 1 and a B-box type 2, and a coiled-coil region. This phosphoprotein localizes to nuclear bodies where it functions as a transcription factor and tumor suppressor. Its expression is cell-cycle related and it regulates the p53 response to oncogenic signals. The gene is often involved in the translocation with the retinoic acid receptor alpha gene associated with acute promyelocytic leukemia (APL). Extensive alternative splicing of

this gene results in several variations of the protein's central and C-terminal regions; all variants encode the same N-terminus. Alternatively spliced transcript variants encoding different isoforms have been identified.
