

PNMA1 Antibody (monoclonal) (M01)**Mouse monoclonal antibody raised against a partial recombinant PNMA1.****Catalog # AT3360a****Specification**

PNMA1 Antibody (monoclonal) (M01) - Product Information

Application	WB, IHC, E
Primary Accession	Q8ND90
Other Accession	NM_006029
Reactivity	Human, Mouse
Host	mouse
Clonality	Monoclonal
Isotype	IgG2a Kappa
Calculated MW	39761

PNMA1 Antibody (monoclonal) (M01) - Additional Information**Gene ID** 9240**Other Names**

Paraneoplastic antigen Ma1, 37 kDa neuronal protein, Neuron- and testis-specific protein 1, PNMA1, MA1

Target/Specificity

PNMA1 (NP_006020, 62 a.a. ~ 160 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB~~1:500~1000

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

PNMA1 Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

PNMA1 Antibody (monoclonal) (M01) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)

- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

PNMA1 Antibody (monoclonal) (M01) - Images

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (36.63 kDa) .

PNMA1 monoclonal antibody (M01), clone 4G6 Western Blot analysis of PNMA1 expression in IMR-32 (Cat # AT3360a)

PNMA1 monoclonal antibody (M01), clone 4G6. Western Blot analysis of PNMA1 expression in Raw 264.7 (Cat # AT3360a)

Immunoperoxidase of monoclonal antibody to PNMA1 on formalin-fixed paraffin-embedded human stomach. [antibody concentration 3 ug/ml]

Detection limit for recombinant GST tagged PNMA1 is approximately 0.1ng/ml as a capture antibody.

PNMA1 Antibody (monoclonal) (M01) - Background

The PNMA1 gene encodes an antineuronal antibody (anti-Ma) present in patients with paraneoplastic neurologic disorders (Dalmau et al., 1999 [PubMed 10050892]). Some paraneoplastic syndromes affecting the nervous system are associated with antibodies that react with neuronal proteins and the causal tumor (onconeural antigens) (summarized by Dalmau et al., 1999 [PubMed 10050892]). Several of these antibodies are markers of specific neurologic syndromes associated with distinct types of cancer. The presence of some antibodies is so specific that disorders previously identified by brain biopsy or at autopsy can be diagnosed serologically. The expression of neuronal proteins by the tumor appears to be a crucial step that breaks the immune tolerance for otherwise normal neuronal proteins. The identity of most onconeural antigens was established by probing human cDNA expression libraries with serum containing antineuronal antibodies.
