

PROCR Antibody (monoclonal) (M01)

Mouse monoclonal antibody raised against a full length recombinant PROCR.

Catalog # AT3439a

Specification

PROCR Antibody (monoclonal) (M01) - Product Information

| | |
|-------------------|--------------------------|
| Application | E |
| Primary Accession | O9UNN8 |
| Other Accession | BC014451 |
| Reactivity | Human |
| Host | mouse |
| Clonality | Monoclonal |
| Isotype | IgG1 kappa |
| Calculated MW | 26671 |

PROCR Antibody (monoclonal) (M01) - Additional Information

Gene ID 10544

Other Names

Endothelial protein C receptor, Activated protein C receptor, APC receptor, Endothelial cell protein C receptor, CD201, PROCR, EPCR

Target/Specificity

PROCR (AAH14451.1, 1 a.a. ~ 238 a.a) full-length recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

PROCR Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

PROCR Antibody (monoclonal) (M01) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)

- [Flow Cytometry](#)
- [Cell Culture](#)

PROCR Antibody (monoclonal) (M01) - Images

Detection limit for recombinant GST tagged PROCR is approximately 3ng/ml as a capture antibody.

PROCR Antibody (monoclonal) (M01) - Background

The protein encoded by this gene is a receptor for activated protein C, a serine protease activated by and involved in the blood coagulation pathway. The encoded protein is an N-glycosylated type I membrane protein that enhances the activation of protein C. Mutations in this gene have been associated with venous thromboembolism and myocardial infarction, as well as with late fetal loss during pregnancy.
