

RAD51 Antibody (monoclonal) (M01)**Mouse monoclonal antibody raised against a full length recombinant RAD51.****Catalog # AT3548a****Specification**

RAD51 Antibody (monoclonal) (M01) - Product Information

Application	WB, E
Primary Accession	Q06609
Other Accession	BC001459
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG1 Kappa
Calculated MW	36966

RAD51 Antibody (monoclonal) (M01) - Additional Information**Gene ID** 5888**Other Names**

DNA repair protein RAD51 homolog 1, HsRAD51, hRAD51, RAD51 homolog A, RAD51, RAD51A, RECA

Target/Specificity

RAD51 (AAH01459, 1 a.a. ~ 242 a.a) full-length recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB~~1:500~1000

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

RAD51 Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

RAD51 Antibody (monoclonal) (M01) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)

- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

RAD51 Antibody (monoclonal) (M01) - Images

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (52.36 kDa) .

RAD51 monoclonal antibody (M01), clone 2E5-E5 Western Blot analysis of RAD51 expression in HeLa ((Cat # AT3548a)

Western Blot analysis of RAD51 expression in transfected 293T cell line by RAD51 monoclonal antibody (M01), clone 2E5-E5.

Lane 1: RAD51 transfected lysate(37 KDa).
Lane 2: Non-transfected lysate.

Detection limit for recombinant GST tagged RAD51 is approximately 0.03ng/ml as a capture antibody.

RAD51 Antibody (monoclonal) (M01) - Background

The protein encoded by this gene is a member of the RAD51 protein family. RAD51 family members are highly similar to bacterial RecA and *Saccharomyces cerevisiae* Rad51, and are known to be involved in the homologous recombination and repair of DNA. This protein can interact with the ssDNA-binding protein RPA and RAD52, and it is thought to play roles in homologous pairing and strand transfer of DNA. This protein is also found to interact with BRCA1 and BRCA2, which may be important for the cellular response to DNA damage. BRCA2 is shown to regulate both the intracellular localization and DNA-binding ability of this protein. Loss of these controls following BRCA2 inactivation may be a key event leading to genomic instability and tumorigenesis. Multiple transcript variants encoding different isoforms have been found for this gene.
