SCYE1 Antibody (monoclonal) (M02)

Mouse monoclonal antibody raised against a full length recombinant SCYE1.
Catalog # AT3796a

Specification

SCYE1 Antibody (monoclonal) (M02) - Product Information

Application	**IF, E**
Primary Accession	Q12904
Other Accession	BC014051
Reactivity	**Human**
Host	**mouse**
Clonality	**Monoclonal**
Isotype	**IgG1 kappa**
Calculated MW	**34353**

SCYE1 Antibody (monoclonal) (M02) - Additional Information

Gene ID 9255

Other Names
Aminoacyl tRNA synthase complex-interacting multifunctional protein 1, Multisynthase complex auxiliary component p43, Endothelial monocyte-activating polypeptide 2, EMAP-2, Endothelial monocyte-activating polypeptide II, EMAP-II, Small inducible cytokine subfamily E member 1, AIMP1, EMAP2, SCYE1

Target/Specificity
SCYE1 (AAH14051, 1 a.a. ~ 312 a.a) full-length recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Format
Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage
Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions
SCYE1 Antibody (monoclonal) (M02) is for research use only and not for use in diagnostic or therapeutic procedures.

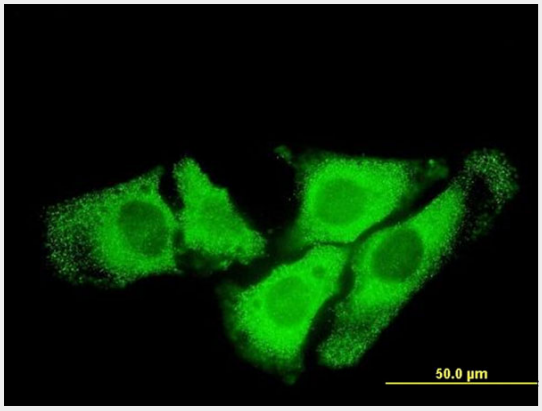

SCYE1 Antibody (monoclonal) (M02) - Protocols

Provided below are standard protocols that you may find useful for product applications.

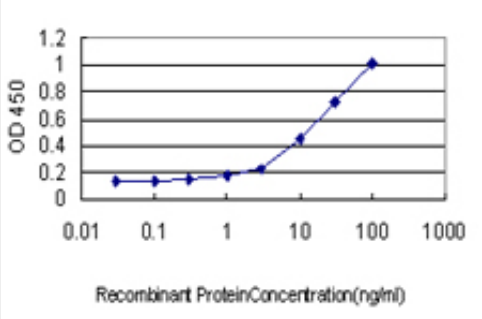

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry

- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

SCYE1 Antibody (monoclonal) (M02) - Images

Immunofluorescence of monoclonal antibody to SCYE1 on HeLa cell . [antibody concentration 10 ug/ml]

Detection limit for recombinant GST tagged SCYE1 is approximately 1ng/ml as a capture antibody.

SCYE1 Antibody (monoclonal) (M02) - Background

The protein encoded by this gene is a cytokine that is specifically induced by apoptosis, and it is involved in the control of angiogenesis, inflammation, and wound healing. The release of this cytokine renders the tumor-associated vasculature sensitive to tumor necrosis factor. The precursor protein is identical to the p43 subunit, which is associated with the multi-tRNA synthetase complex, and it modulates aminoacylation activity of tRNA synthetase in normal cells. This protein is also involved in the stimulation of inflammatory responses after proteolytic cleavage in tumor cells. Multiple transcript variants encoding different isoforms have been found for this gene. A pseudogene has been identified on chromosome 20.
