## HSF 2 Antibody (Center)

Affinity Purified Rabbit Polyclonall Antibody (Pab)
Catalog \# AW5101

## Specification

HSF 2 Antibody (Center) - Product Information

```
Application
Primary Accession
WB,E
Other Accession
Q03933
Reactivity
NP 004497.1
Human
Predicted
```

## Mouse

```
Host
Clonality
Rabbit
Polyclonal
Calculated MW
\(\mathrm{H}=60,58 ; \mathrm{M}=60,58 \mathrm{KDa}\)
Isotype
Rabbit IgG
Antigen Source

## HUMAN

## HSF2 Antibody (Center) - Additional Information

Gene ID 3298

Antigen Region
216-245
Other Names
HSF2; HSTF2; Heat shock factor protein 2; Heat shock transcription factor 2

## Dilution

WB~~1:1000

## Target/Specificity

This HSF2 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 216-245 amino acids from the Central region of human HSF2.

## Format

Purified polyclonal antibody supplied in PBS with $0.09 \%$ (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

## Storage

Maintain refrigerated at $2-8^{\circ} \mathrm{C}$ for up to 2 weeks. For long term storage store at $-20^{\circ} \mathrm{C}$ in small aliquots to prevent freeze-thaw cycles.

## Precautions

HSF2 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

## Name HSF2

## Synonyms HSTF2

## Function

DNA-binding protein that specifically binds heat shock promoter elements (HSE) and activates transcription. In higher eukaryotes, HSF is unable to bind to the HSE unless the cells are heat shocked.

## Cellular Location

Cytoplasm. Nucleus. Note=Cytoplasmic during normal growth and moves to the nucleus upon activation

## HSF2 Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

HSF2 Antibody (Center) - Images

Western blot analysis of lysates from A549,Hela cell line (from left to right), using HSF2 Antibody (Center)(Cat. \#AW5101). AW5101 was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H\&L(HRP) at 1:10000 dilution was used as the secondary antibody.

## HSF2 Antibody (Center) - Background

HSF2, as well as the related gene HSF1, encodes a protein that binds specifically to the heat-shock element and has homology to HSFs of other species. Heat shock transcription factors activate
heat-shock response genes under conditions of heat or other stresses. Although the names HSF1 and HSF2 were chosen for historical reasons, these peptides should be referred to as heat-shock transcription factors.
