

#### Stat3 antibody

Purified Mouse Monoclonal Antibody (Mab)
Catalog # AW5231

### **Specification**

## Stat3 antibody - Product Information

Application WB,E
Primary Accession P40763

Other Accession <u>P52631</u>, <u>Q19S50</u>, <u>P42227</u>

Reactivity Human

Predicted Mouse, Rat, Pig

Host Mouse
Clonality Monoclonal
Calculated MW H=88 KDa
Isotype IgG2a,k
Antigen Source HUMAN

# **Stat3 antibody - Additional Information**

#### **Gene ID 6774**

### **Antigen Region**

1-280

## **Other Names**

Signal transducer and activator of transcription 3, Acute-phase response factor, STAT3, APRF

#### **Dilution**

WB~~1:1000

#### **Target/Specificity**

This Stat3 antibody is generated from a mouse immunized with Stat3 recombinant protein.

### **Format**

Purified monoclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein G column, followed by dialysis against PBS.

### **Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

#### **Precautions**

Stat3 antibody is for research use only and not for use in diagnostic or therapeutic procedures.

# Stat3 antibody - Protein Information

Name STAT3 {ECO:0000303|PubMed:9630560, ECO:0000312|HGNC:HGNC:11364}

## **Function**

Signal transducer and transcription activator that mediates cellular responses to interleukins, KITLG/SCF, LEP and other growth factors (PubMed:<a href="http://www.uniprot.org/citations/10688651" target="\_blank">10688651</a>, PubMed:<a href="http://www.uniprot.org/citations/12359225" target=" blank">12359225</a>, PubMed:<a href="http://www.uniprot.org/citations/12873986" target="blank">12873986</a>, PubMed:<a href="http://www.uniprot.org/citations/15194700" target="\_blank">15194700</a>, PubMed:<a href="http://www.uniprot.org/citations/16285960" target="blank">16285960</a>, PubMed:<a href="http://www.uniprot.org/citations/15653507" target="blank">15653507</a>, PubMed:<a href="http://www.uniprot.org/citations/17344214" target="\_blank">17344214</a>, PubMed:<a href="http://www.uniprot.org/citations/18242580" target="blank">18242580</a>, PubMed:<a href="http://www.uniprot.org/citations/18782771" target="blank">18782771</a>, PubMed:<a href="http://www.uniprot.org/citations/22306293" target="blank">22306293</a>, PubMed:<a href="http://www.uniprot.org/citations/23084476" target="blank">23084476</a>, PubMed:<a  $href="http://www.uniprot.org/citations/32929201"\ target="\_blank">32929201</a>, PubMed:<a https://www.uniprot.org/citations/32929201" target="_blank">32929201</a>, PubMed:<a https://www.uniprot.org/citations/32929201" target="_blank">32929201</a>, PubMed:<a https://www.uniprot.org/citations/32929201" target="_blank">32929201</a>, PubMed:<a https://www.uniprot.org/citations/$ href="http://www.uniprot.org/citations/28262505" target="blank">28262505</a>). Once activated, recruits coactivators, such as NCOA1 or MED1, to the promoter region of the target gene (PubMed: <a href="http://www.uniprot.org/citations/16285960" target=" blank">16285960</a>, PubMed:<a href="http://www.uniprot.org/citations/15653507" target="blank">15653507</a>, PubMed:<a href="http://www.uniprot.org/citations/17344214" target=" blank">17344214</a>, PubMed:<a href="http://www.uniprot.org/citations/18782771" target="blank">18782771</a>, PubMed:<a href="http://www.uniprot.org/citations/28262505" target="blank">28262505</a>, PubMed:<a href="http://www.uniprot.org/citations/32929201" target="blank">32929201</a>). May mediate cellular responses to activated FGFR1, FGFR2, FGFR3 and FGFR4 (PubMed: <a href="http://www.uniprot.org/citations/12873986" target=" blank">12873986</a>). Upon activation of IL6ST/gp130 signaling by interleukin-6 (IL6), binds to the IL6-responsive elements identified in the promoters of various acute-phase protein genes (PubMed: <a href="http://www.uniprot.org/citations/12359225" target=" blank">12359225</a>). Activated by IL31 through IL31RA (PubMed:<a href="http://www.uniprot.org/citations/15194700" target=" blank">15194700</a>). Acts as a regulator of inflammatory response by regulating differentiation of naive CD4(+) T-cells into T-helper Th17 or regulatory T-cells (Treg): acetylation promotes its transcription activity and cell differentiation while deacetylation and oxidation of lysine residues by LOXL3 inhibits differentiation (PubMed:<a href="http://www.uniprot.org/citations/28262505" target=" blank">28262505</a>, PubMed:<a href="http://www.uniprot.org/citations/28065600" target=" blank">28065600</a>). Involved in cell cycle regulation by inducing the expression of key genes for the progression from G1 to S phase, such as CCND1 (PubMed:<a href="http://www.uniprot.org/citations/17344214" target=" blank">17344214</a>). Mediates the effects of LEP on melanocortin production, body energy homeostasis and lactation (By similarity). May play an apoptotic role by transctivating BIRC5 expression under LEP activation (PubMed:<a href="http://www.uniprot.org/citations/18242580" target=" blank">18242580</a>). Cytoplasmic STAT3 represses macroautophagy by inhibiting EIF2AK2/PKR activity (PubMed: <a href="http://www.uniprot.org/citations/23084476" target=" blank">23084476</a>). Plays a crucial role in basal beta cell functions, such as regulation of insulin secretion (By similarity). Following JAK/STAT signaling activation and as part of a complex with NFATC3 and NFATC4, binds to the alpha-beta E4 promoter region of CRYAB and activates transcription in cardiomyocytes (By similarity).

#### **Cellular Location**

Cytoplasm. Nucleus. Note=Shuttles between the nucleus and the cytoplasm. Translocated into the nucleus upon tyrosine phosphorylation and dimerization, in response to signaling by activated FGFR1, FGFR2, FGFR3 or FGFR4 (PubMed:16285960, PubMed:15653507). Constitutive nuclear presence is independent of tyrosine phosphorylation. Predominantly present in the cytoplasm without stimuli. Upon leukemia inhibitory factor (LIF) stimulation, accumulates in the nucleus. The complex composed of BART and ARL2 plays an important role in the nuclear translocation and retention of STAT3. Identified in a complex with LYN and PAG1. Translocates to the nucleus in the presence of EDN1 (By similarity). {ECO:0000250|UniProtKB:P52631,

ECO:0000269|PubMed:15653507, ECO:0000269|PubMed:16285960}

#### **Tissue Location**

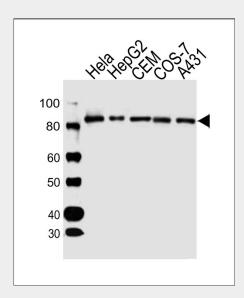

Heart, brain, placenta, lung, liver, skeletal muscle, kidney and pancreas. Expressed in naive CD4(+) T cells as well as T-helper Th17, Th1 and Th2 cells (PubMed:31899195)

### Stat3 antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

## Stat3 antibody - Images

Western blot analysis of lysates from Hela,HepG2,CEM,COS-7,A431 cell line (from left to right), using Stat3 Antibody(Cat. #AW5231). AW5231 was diluted at 1:1000 at each lane. A goat anti-mouse IgG H&L(HRP) at 1:10000 dilution was used as the secondary antibody.

# Stat3 antibody - Background

Signal transducer and transcription activator that mediates cellular responses to interleukins, KITLG/SCF and other growth factors. May mediate cellular responses to activated FGFR1, FGFR2, FGFR3 and FGFR4. Binds to the interleukin-6 (IL-6)- responsive elements identified in the promoters of various acute- phase protein genes. Activated by IL31 through IL31RA. Cytoplasmic STAT3 represses macroautophagy by inhibiting EIF2AK2/PKR activity. Plays an important role in host defense in methicillin-resistant S.aureus lung infection by regulating the expression of the antimicrobial lectin REG3G (By similarity).
