

# GAS2L1 Antibody (C-term) Blocking peptide

Synthetic peptide Catalog # BP10234b

### **Specification**

## GAS2L1 Antibody (C-term) Blocking peptide - Product Information

Primary Accession <u>Q99501</u>

Other Accession NP 689422.1, NP 689423.1, NP 006469.2

## GAS2L1 Antibody (C-term) Blocking peptide - Additional Information

**Gene ID** 10634

#### **Other Names**

GAS2-like protein 1, GAS2-related protein on chromosome 22, Growth arrest-specific protein 2-like 1, GAS2L1, GAR22

#### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

## GAS2L1 Antibody (C-term) Blocking peptide - Protein Information

Name GAS2L1

**Synonyms** GAR22

## **Function**

Involved in the cross-linking of microtubules and microfilaments (PubMed:<a href="http://www.uniprot.org/citations/12584248" target="\_blank">12584248</a>, PubMed:<a href="http://www.uniprot.org/citations/24706950" target="\_blank">24706950</a>). Regulates microtubule dynamics and stability by interacting with microtubule plus-end tracking proteins, such as MAPRE1, to regulate microtubule growth along actin stress fibers (PubMed:<a href="http://www.uniprot.org/citations/24706950" target="\_blank">24706950</a>).

## **Cellular Location**

Cytoplasm, cytoskeleton. Cytoplasm, cytoskeleton, stress fiber. Note=Colocalizes with the tips of microtubule plus ends.

## GAS2L1 Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

### • Blocking Peptides

## GAS2L1 Antibody (C-term) Blocking peptide - Background

The protein encoded by this gene, a member of the GAS2family, is similar in sequence to the mouse protein Gas2, anactin-associated protein expressed at high levels ingrowth-arrested cells. Expression of the mouse Gas2 gene isnegatively regulated by serum and growth factors. Three transcriptvariants encoding two different isoforms have been found for thisgene.
